Sundown

Complete
Calf Feed

Age-specific feeds to match the needs of the developing rumen, from birth to six-months of age.

- ✔ Reduce Weaning Age
- ✔ Avoid 'post weaning slump'
- ✔ Palatable for high intakes
- ✔ Digestible for rapid rumen development
- ✔ High starch
  - Large particle size to allow gentle digestion
  - Multiple starch sources to help develop microflora
- ✔ Includes NIS to stabilise the rumen

Sundown

Forage Fibre
Specialists

Made in the UK

Sundown has been manufacturing forage fibre feeds for over 50 years.

Our products focus on supporting good rumen health to optimise lifetime production values.

Nationwide Delivery
Calf feed available in bags or bulk (blown or tipped).

Sundown 50
Celebrating 50 years of Sundown in 2026

Complete
Calf Feed

- ✔ Reduce Weaning Age
- ✔ Avoid 'Post-Weaning Slump'
- ✔ Forage included, no nutritional need for additional forage

sundownagri.co.uk

Calf Starter

Birth to start of weaning

A very palatable feed to encourage critical early intake, and begin rumen development at the earliest possible opportunity.

- ✔ High starch for initial rumen development
- ✔ Includes Triple P Prebiotic proven protection from pathogens
- ✔ No minerals – to avoid over mineralisation

Ingredients: Rolled Maize, Rolled Wheat, Hi Pro Soya, Rolled Beans, NIS, Molasses, TripleP.

Analysis (fresh weight):

DM	88%
Crude Protein	19.5%
Crude Fibre	5.3%
Starch & Sugar	43%

Calf Weaner

Start of weaning until three weeks after weaning

A feed designed to support weaning transition, with rapidly increasing intakes.

- ✔ High starch to maximise available energy
- ✔ Contains NIS to maintain healthy rumen function as intakes rise
- ✔ Vitamins and minerals included

Ingredients: Rolled Maize, Rolled Wheat, Hi Pro Soya, Rolled Beans, NIS, Molasses, Minerals and Vitamins.

Analysis (fresh weight):

DM	88%
Crude Protein	19%
Crude Fibre	8%
Starch & Sugar	38%

Calf Grower

Three weeks after weaning to six months old

A high forage and starch pellet to deliver the energy required to avoid post-weaning slump until the rumen is fully developed.

- ✔ High in digestible forage
- ✔ Multiple starch and protein sources to increase microbe diversity
- ✔ Most economic period of growth

Ingredients: NIS, Rolled Wheat, Rolled Maize, Rolled Beans, Soya Bean Meal, Rape Meal, Molasses, Minerals and Vitamins.

Analysis (fresh weight):

DM	88%
Crude Protein	16%
Crude Fibre	9.5%
Starch & Sugar	32%
