

ATLS

10th Edition Range

The products in this range offer a cost-effective solution to the simulation equipment needed for the **ATLS 10th edition** from the American College of Surgeons, making it easy for training providers to deliver this new course.

Our products are tested by leading ATLS educators and offer a realistic alternative to traditional training products without compromising on quality.

Learning has never been more lifelike

CHEST DRAIN & NEEDLE DECOMPRESSION TRAINER

60230

NOW
FEATURES
NEEDLE
DECOMPRESSION
AT THE 5TH
INTERCOSTAL
SPACE

Our Chest Drain and Needle Decompression Trainer has been designed to meet the specific requirements of healthcare professionals training in surgical or guidewire-assisted thoracostomy and thoracentesis.

This product allows for a variety of chest drain insertion techniques to be performed including ultrasound-guided techniques.

Ideal for ATLS courses.

- 1 Blunt dissection
- 2 Chest tube insertion
- 3 Seldinger technique
- 4 Internal anatomy visible under ultrasound
- 5 Realistic needle decompression

NEW UPGRADE KITS

Can be added to Chest Drain models purchased before 2018.
Allows needle decompression with Advanced Pads at the 5th intercostal space.

60243 - CHEST DRAIN UPGRADE KIT

60244 - CHEST DRAIN UPGRADE KIT WITH TWO ADVANCED PADS

AIRSIM ADVANCE X

TCAA91100X *Improved design*

Designed to provide true, anatomically correct and visually accurate internal features to allow for airway management techniques.

AIRSIM COMBO X

TCCTC91100X *Improved design*

Combines the uniquely constructed AirSim® airway with the enhanced addition of tracheal rings, simulated cricoid and laryngeal cartilages.

AIRSIM BABY X

TCJR10001X *Improved design*

The AirSim® Baby X, based on a 0-6 month old, provides a realistic and anatomically correct pediatric manikin for airway management training.

The manikin facilitates training in the use of bag/mask ventilation, supraglottic airway insertion and both naso and orotracheal intubation.

AIRSIM CHILD COMBO X

TCCC10006X *Improved design*

Ideal for practising oral and nasal intubation training techniques, percutaneous tracheostomy and emergency cricothyrotomy on a 6 year old child.

TRUCRIC

TCTCRIC/

The TruCric is ideal for practising emergency needle and surgical cricothyroidotomy techniques. The model also facilitates percutaneous tracheostomy procedures.

Anatomically accurate features including; tracheal rings, simulated cricoid, cricothyroid membrane and laryngeal cartilages helps provide realistic training in front of neck access techniques.

ATLS

10th Edition Range

Early next year, the 10th edition of the renowned **Advanced Trauma Life Support (ATLS)** course from the **American College of Surgeon (ACS)** will become available.

We're proud to provide a cost-effective solution to the simulation equipment needed for the ATLS 10th edition. Our aim is to make it easy for training providers to deliver this new course. With full user manuals and support available, our ATLS suitable products are now available to purchase.

The ATLS is now taught worldwide and gives medics a systematic approach on how to care for trauma patients. The course has now been taught to over 1 million doctors in over 50 countries and it continues to evolve including the new 10th edition featuring new hybrid learning.

Designed for doctors who treat trauma patients both frequently and infrequently, the ATLS course is a measurable standard and provides a comprehensive system for the treatment of trauma patients.
