

Builds on the world-class comfort and features of the S-Face Mask

Prepared for voice communication system, HUD and spectacle kit

Ergonomic head harness with easily operated buckles

Demand controlled breathing valve activated from inner mask, with quick response time and excellent breathing performance

Safety flag is visible when ambient air hatch is open, reminding the user to close it when entering a dangerous environment

Push lever to close ambient air hatch

Quick connection of breathing valve to face mask

## The Inspire™ Mask

# Never again hold your breath for a breath of fresh air

Ambient air is great for saving air supply, but connecting the breathing valve in a hurry carries unnecessary risks. To make sure your mask never fills up with smoke, we installed an air hatch that lets you keep the breathing valve connected at all times and still breathe ambient air at will. The hatch opens through a safe double action release mechanism, and needs just a simple push to close.
