New  
Mission !!

# NELSON

**DSEI – Day Zero – Monday 9<sup>th</sup> September**

**Accessible Data – Intelligent Applications – Digital Delivery**

**The world's leading Digital Navy,  
culturally and technically data driven,  
getting the best from our partners**

# Digital and Data Plan

**“The future of warfare will depend on dominance in data processing and the relentless pursuit and exploitation of digital capabilities”**

- Provide a clear picture of what success looks like and the ways and means of achieving it
- Enable the development of tools and technology deliver these outcomes
- Attract the right people to drive, sustain and improve digital transformation
- Deliver the grip, accountability and leadership to ensure success

1.	<b>Support our people to meet their needs in the digital age</b> Ensure our people are supported to be intelligent customers when identifying digital opportunities to solve their needs.
2.	<b>Make decisions on the best evidence available</b> Become a data-driven organisation by enabling data led decision making.
3.	<b>Be clear about the benefit - frontline and back office</b> Everything we do must provide clear benefit and value for the wider organisation.
4.	<b>Design for scale</b> Digital transformation is delivered at scale in order that its benefits are far reaching.
5.	<b>Build for sustainability – have a plan for what comes next</b> Ensure that digital transformation brings long-term, lasting value the organisation.
6.	<b>Reuse, iterate and improve</b> Understand existing capabilities and adapt, iterate and improve these where possible.
7.	<b>Make it simple</b> Technical subjects must be understandable to non-technical people.
8.	<b>Provide support</b> Training is always provided, particularly for non-digital specialists.
9.	<b>Bring data together to access and share</b> Ensure all information assets are documented and accessible to those who need them.
10.	<b>Integration and collaboration ethos</b> Systems and platforms are interoperable by design.

# Enterprise endeavour

Digital and data  
Maritime  
leadership and  
authority

**Accessible and coherent data**

**Intelligent Applications**

**Culture of Digital Delivery**

## Accessible and coherent data

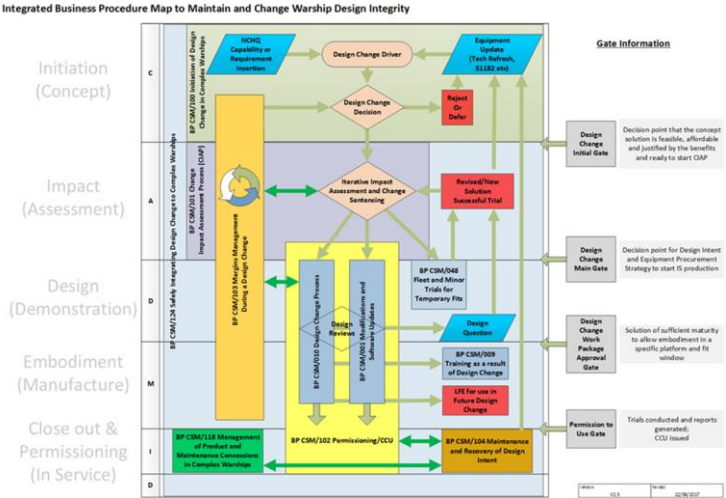

Requirements exploiting digital opportunities and fulfilling user needs – not just replacing analogue obsolescence
