

# Royal Marines Accelerating into the Future

Littoral Strike and the Future Commando Force

## Strategic context

The future operating environment will be more complex and ambiguous, from physical to electronic to human aspects. We will habitually be working in an even more combined, joint, inter-agency, intra-governmental and multinational context to contend with the challenges of the future operating environment in 2035."

What will change

# Littoral Strike Programme Director

Col Mark Totten
