## The Humanihut Story.

Neale Sutton is the co-founder & Managing Director of the the rigid, foldable & rapidly deployable Humanihut Field Infrastructure System (HFIS). It was Neale's military experiences deploying on forward operations to support humanitarian, refugee & operational responses in several countries, where he recognised the limitations of tents, & was the catalyst to Neale designing & developing a logistically efficient operational solution. A decade on, the HFIS is now in use by emergency services and government departments globally. Rapidly deployable in hours, the HFIS provides essential military infrastructure including accommodation, medical, storage & life support.

## The Humanihut Field Infrastructure System.

The Humanihut Field Infrastructure System (HFIS) is a rapidly re-deployable, short to long-term infrastructure solution. Innovative in design & engineering, the multi award winning HFIS offers climate controlled, foldable, rigid structures, with integrated modules & ablutions, suitable for a few to thousands. Capable of multiple deployments over its 20+ year lifespan, & with all components, accessories & necessary utilities integrated for rapid deployment & ease of establishment, the HFIS can connect to local mains water, power, & waste-water infrastructure or run independently if services are not available.

Humanihut Logistics offers a complete turnkey site management solution & our highly skilled & experienced team has the capability to ensure your daily site operations are seamlessly & professionally managed.

## What sets Humanihut apart.

- Deployable in built-up, isolated, or remote environments
- Longevity: no limit on the number of deployments during its 20+ year life span
- Foldable, rigid structure, climate controlled, with integrated modules & ablutions
- Integrated water, power, & wastewater if mains not available
- Modular & scalable: accommodating a few to thousands
- Energy efficient, insulated, Colorbond steel-clad walls and roof
- Flexibility for multi-use spaces with ensuite bathrooms optional

## Product Availability & Support.

The entire Humanihut Field Infrastructure System (HFIS) is available globally. Presently deployed in Australia, the Middle East & the United Kingdom & supported from facilities in all three of those regions, the HFIS comes with a 2-year warranty. If a through-life management contract is also subscribed to, the HFIS remains in warranty throughout that contracted period.
