

SWEBOR

**OVER 35 YEARS OF SWEDISH
QUALITY AND TRUST**

WWW.SWEBOR.SE

Steel from Sweden is renowned for its superior quality, consistency and reliability. **For over 35 years**, Swebor has played a key part in building that reputation.

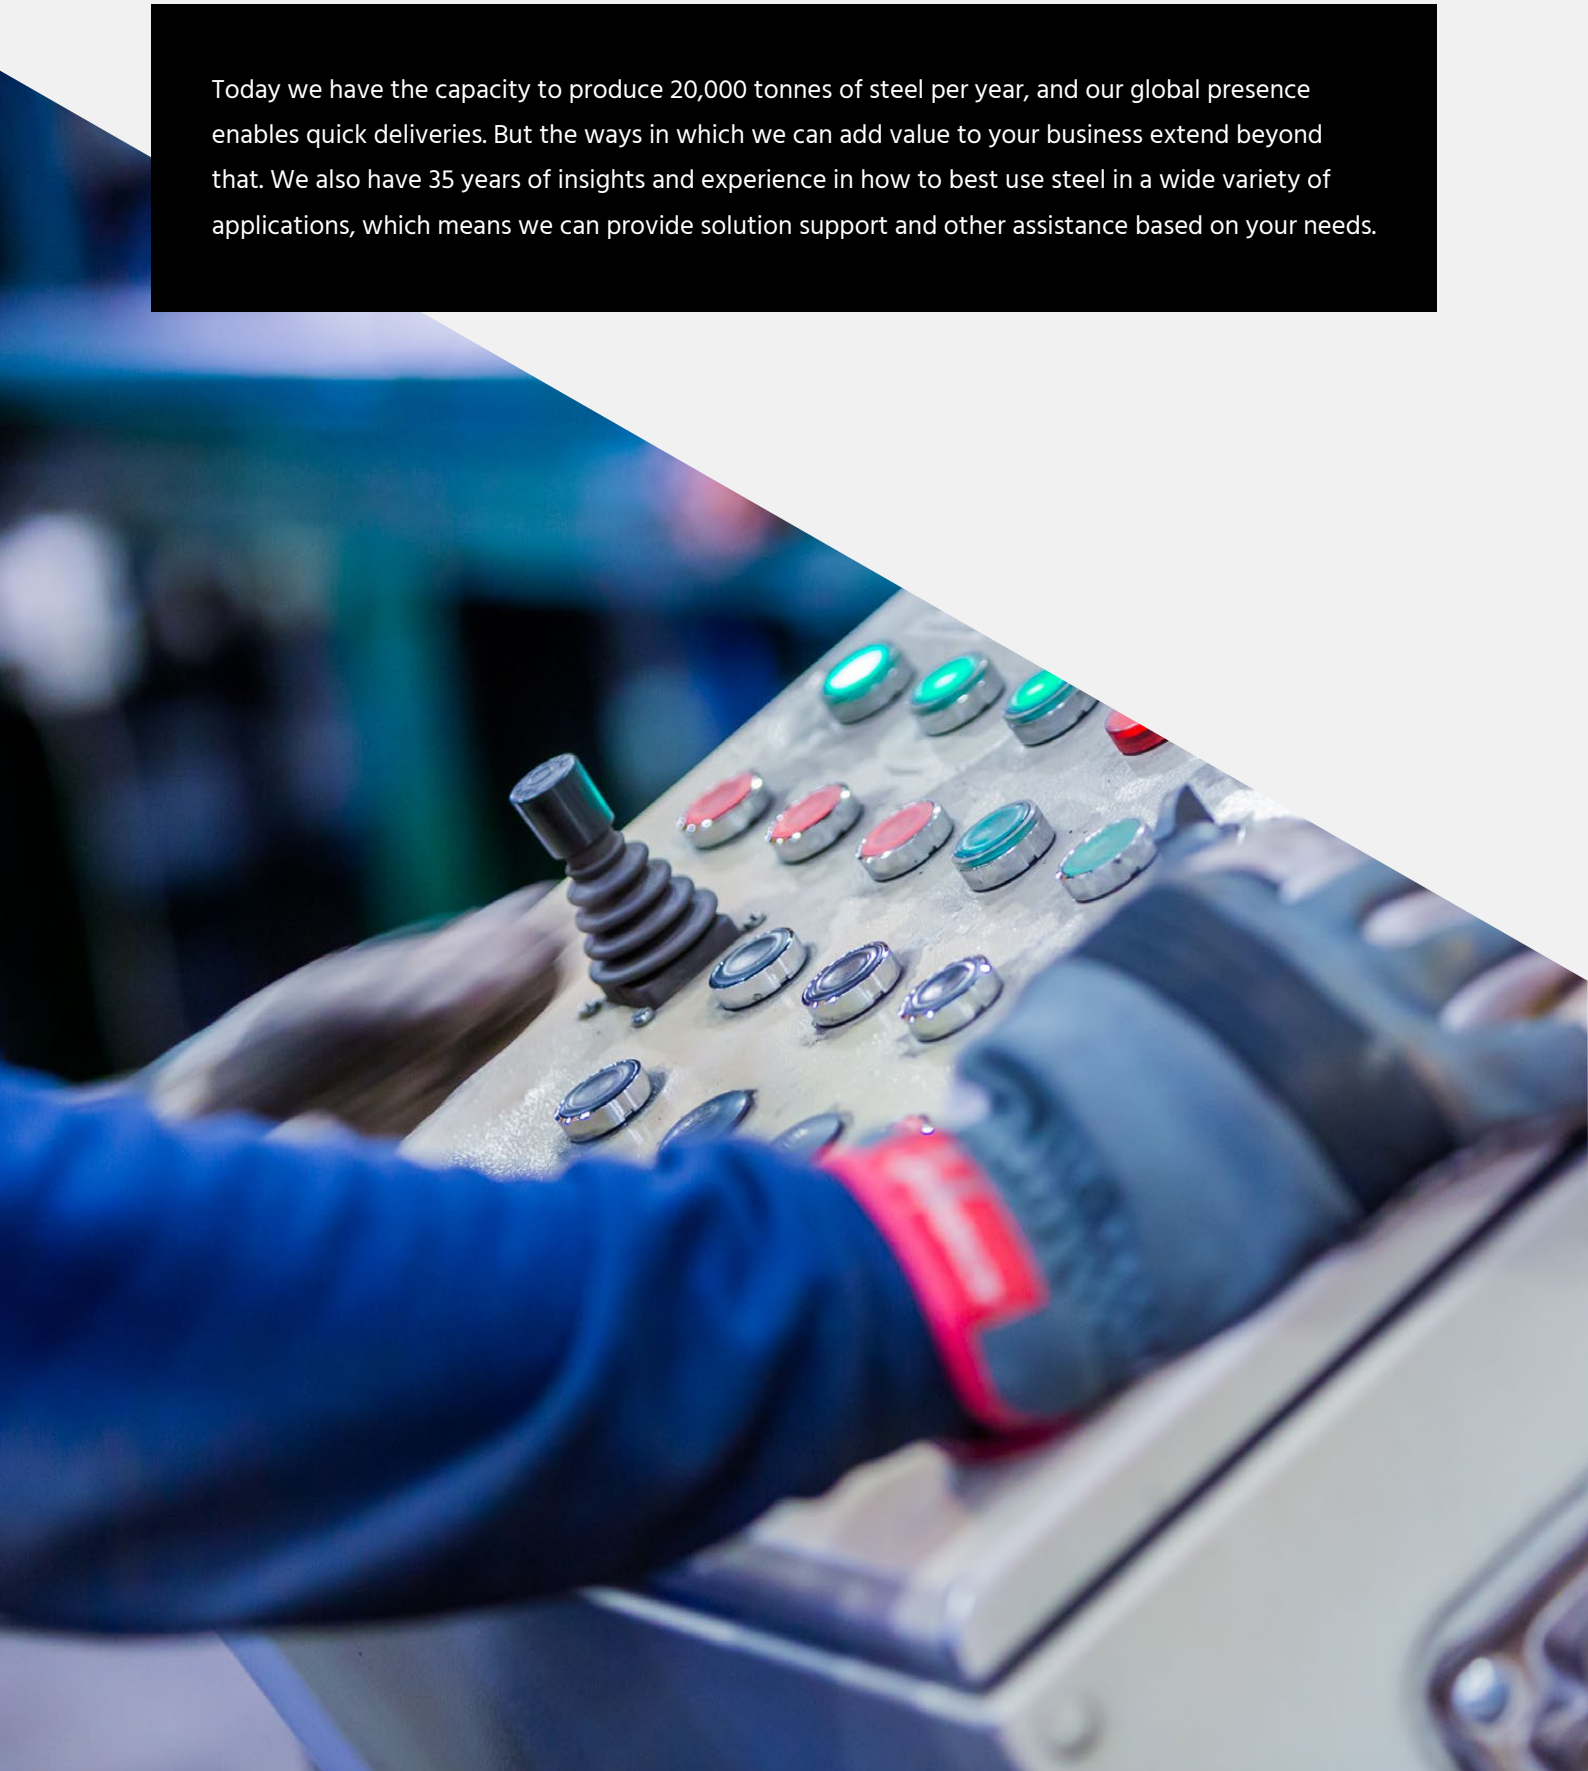

WHO WE ARE

To us, trust is everything. Beyond producing the best possible product, our primary goal is to always deliver on our promises. This is the single most important core value that we rally around at Swebor.

We produce high quality steel in four categories, ranging from vehicle armor to earth moving equipment.

Today we have the capacity to produce 20,000 tonnes of steel per year, and our global presence enables quick deliveries. But the ways in which we can add value to your business extend beyond that. We also have 35 years of insights and experience in how to best use steel in a wide variety of applications, which means we can provide solution support and other assistance based on your needs.

Steel from **Swebor** is made to last.

OUR PRODUCTS

Swebor Armor™

Swebor Wear Plates™

Counterweights™

Swebor Edge & Bar Profiles

Cutting Edges™

Half-Arrow Edges™

Grouser Bars™

Wear Bars™

Swebor Armor™ has an excellent, proven track record in real world conflict scenarios – trusted by vehicle manufacturers and engineers worldwide to **keep people safe.**

Swebor R&D focuses on producing protection steel that is more bendable and weldable, without compromising on protection ability. Swebor Armor™ is available in seven different grades based on hardness and other properties. Swebor Armor™ 600, 560, 550, 500, 440, 400 and Mn.

WHY SWEBOR ARMOR™?

- Large stock for quick and reliable delivery times
- All stock material is tested and certified
- Exclusively strip plates for thickness 2 – 16 mm
- Laser suited surface without additional primer
- Narrow thickness tolerances according to EN 10051
- Supreme flatness
- Good weldability
- ISO certified production
- Over 35 years of experience in production of special steels – also as partner for premium grades of well-known steelworks

We specialize in thin and precise abrasion resistant wear steel with singularly tight variance constraints.

Our specific approach to strip plates production also means we achieve a more even result at any given target thickness. The durable and load-bearing steel is available in five different grades, all produced for a long life in a tough environment. Standard sizes available. Custom dimensions are available upon request.

Swebor Edge & Bar Profiles

We pay attention to detail and durability. We always put great effort into producing high-quality products. Swebor Edge & Bar profiles are no exception.

The production and engineering of steel profiles require a lot of experience and skills, particularly with regards to heat treatment — to not compromise the shape while hardening. That is why we harden our steel after the cut, to guarantee Swedish high-quality steel. Standard sizes available. Custom dimensions are available upon request.

THE PROFILES INCLUDES:

SWEBOR
CUTTING EDGES™

SWEBOR
HALF-ARROW EDGES™

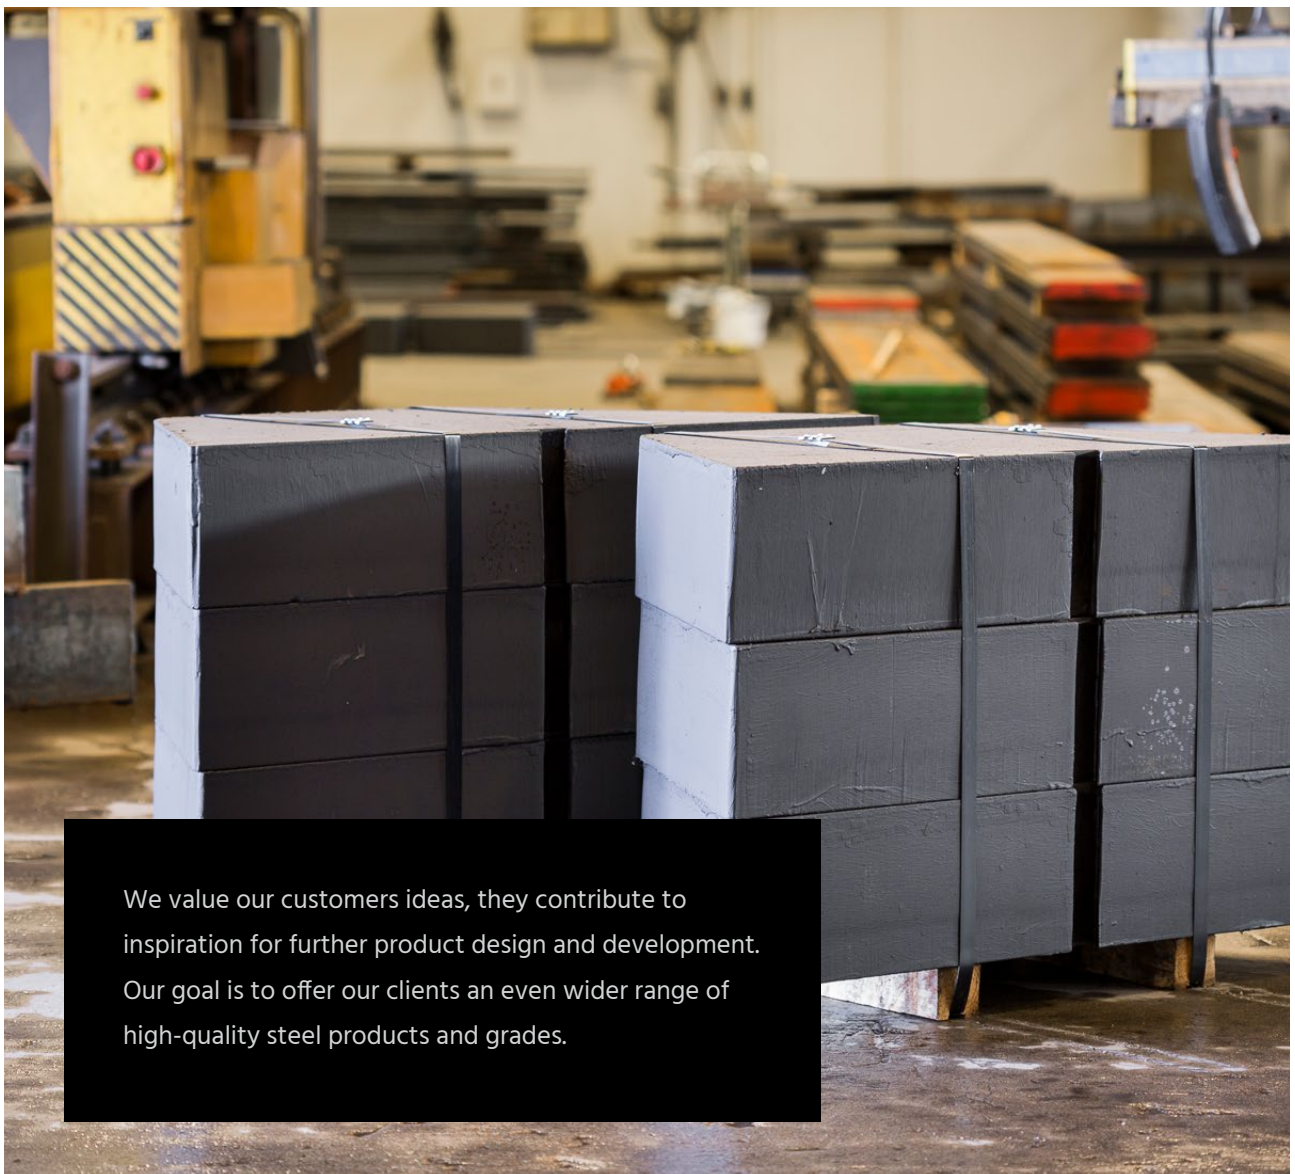

SWEBOR
GROUSER BARS™

SWEBOR
WEAR BARS™

A unique 220mm product with excellent shipping time and pricing, today delivered to 25% of the global lifting industry.

Increase stability with fewer and thicker slabs. With years of experience we'll cut and machine the counterweight to your exact specifications.

We value our customers ideas, they contribute to inspiration for further product design and development. Our goal is to offer our clients an even wider range of high-quality steel products and grades.
