

THERMÓN

THERMAL

Thermal Periscope

Designed for replacing the day block of in-service armored vehicles

Multiple variants to meet any armored vehicle design

Proven uncooled IR sensor technology for superior image quality

Rotation by ± 45 degrees

Drive under any conditions; in day/night, through dust, smoke and dirt

Electronic Image Zoom

Waterproof

Effective & Accurate

THEON SENSORS' THERMÓN Driver Viewer Enhancer (DVE) was developed to provide armored vehicle drivers with the essential requirement of driving during all possible field scenarios; in day or night, through dust, fog and dirt. THEON SENSORS' Driver Viewer Enhancer uses an uncooled Long Wave Infrared sensor (LWIR), electronics and optical technologies to deliver world leading performance and reliability.

With its ruggedized design, THERMÓN Driver Viewer Enhancer ensures prolonged operational availability. The user can manually control the DVE through the display for ease of operation.
