# MAC JEE ARTILLERY AMMUNITION 155 MM

ITAR FREE

NATO STANDARD

## ENERGETIC MATERIALS

Control, quality monitoring of energetic materials and filling are carried out by Mac Jee. Different types of filling are proposed:

## FUZES

• NATO Standard point detonating fuze

• Designed for use in all standard HE artillery 105-155 (and other)

• Standard 2-inch threaded base

• Super-fast selective impact fuses: No delay or 0.05 second delay

## PROPELLANT

• **Type:** M3 / M4A1

• **Full Weight:** 5.5 or 13 pounds

• **Color:** Green or White

• **Firing Zone:** 1 to 5 or 3 to 7

## BODY

Consisting of forged steel body, with a cooper forcing strap.

- **Caliber:** 155 mm (L39)  
High explosive
- **Full Shot Weight:** 42,90Kg
- **Burst Load Weight:** 7Kg
- **Total Firing Length:** 604 mm(Without Fuze)
- **Max Range:** 14600 meters (in 39 caliber)

**THE MAC JEE GROUP** now offers 155-millimeter artillery ammunition. True to its philosophy, all phases of manufacturing, forging, machining, filling, assembly are carried out under the control of MAC JEE in Brazil.

It is supplied in wooden pallets of 8 units, and each projectile comes with a lifting eye for handling and transport.

100%  
MANUFACTURED  
IN BRAZIL
