The future of public transport ticket sales: automatic ticketing

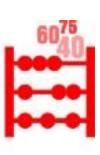

Stop A Stop B Subsequently

Check in → Travel → Check out → Price calculation

First: common, transparent and coherent statutory regulations

8

Ordinance on Passenger Transport Art. 16+17

"[...] Where a need exists, long-distance and regional transport services must provide a direct service and be responsible for developing standard fares and tickets."

States how transport operators are required to collaborate

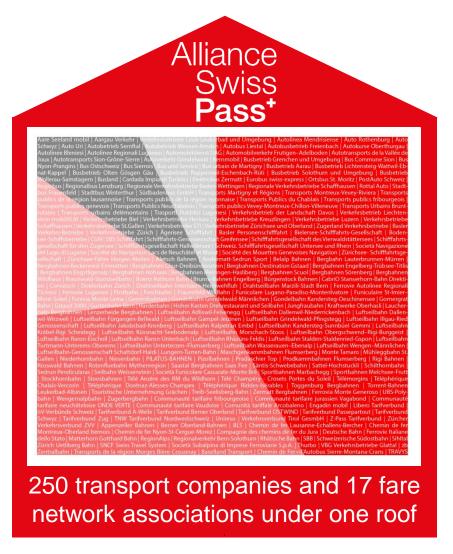

Second: A common organisation

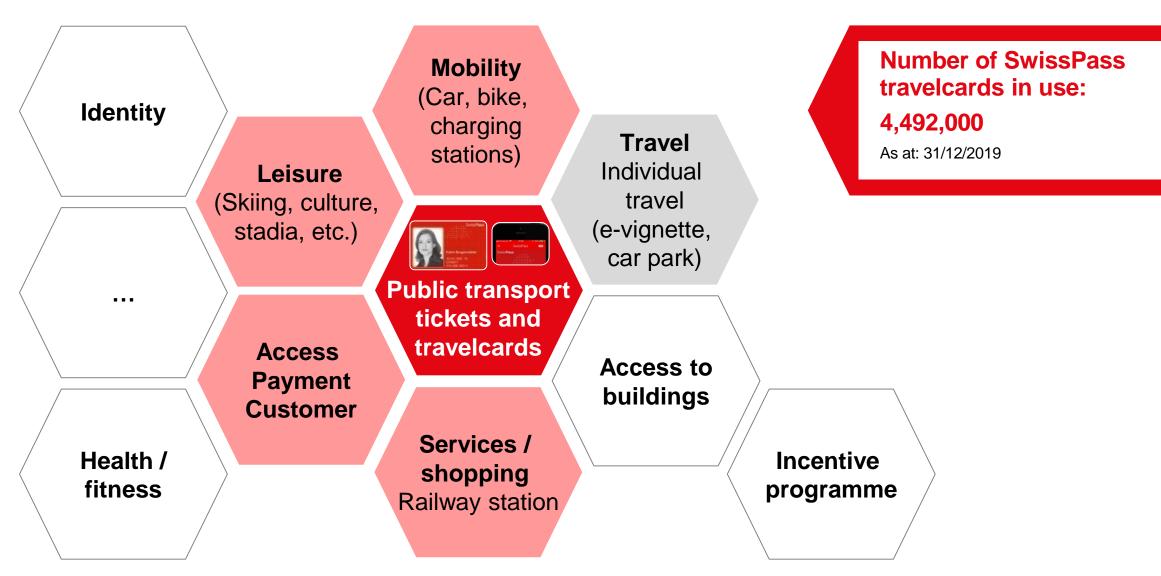

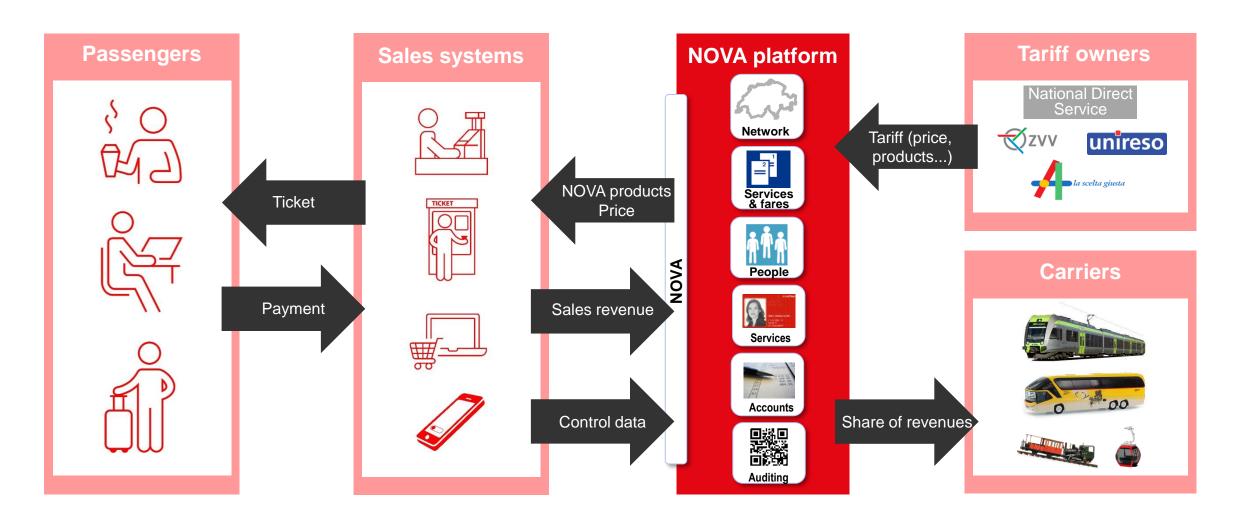

Third: A common travel card – the SwissPass

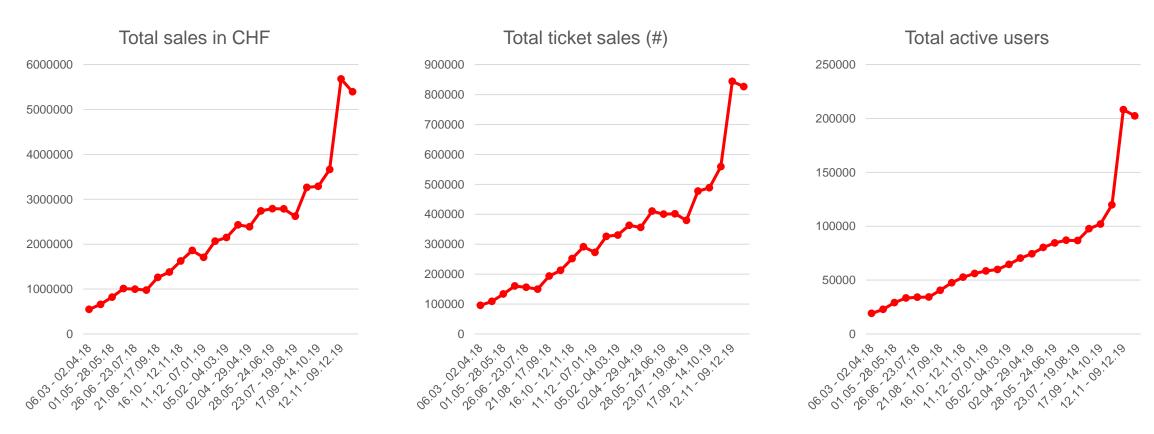

Fourth: A common database

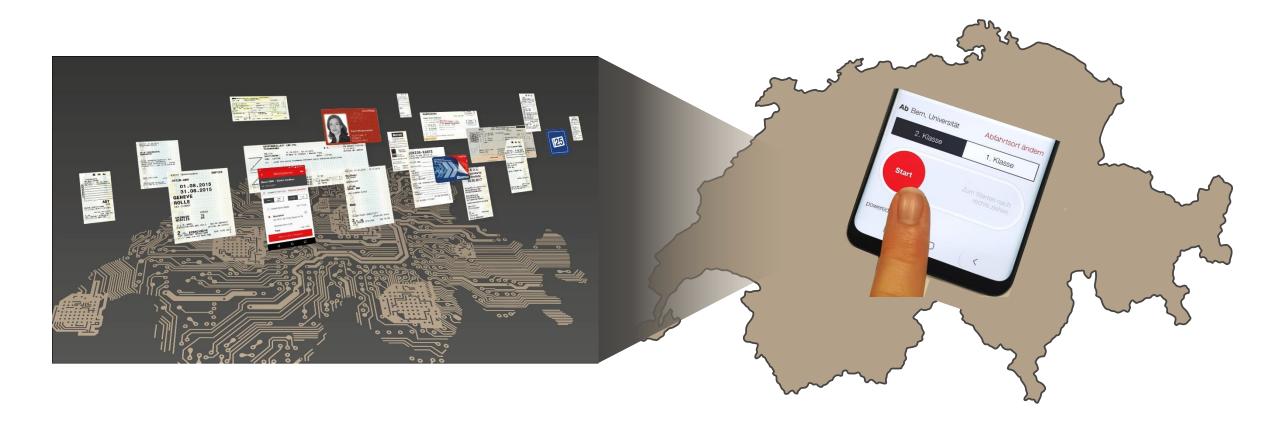

Strong increase in automatic ticketing sales and usage numbers during market test

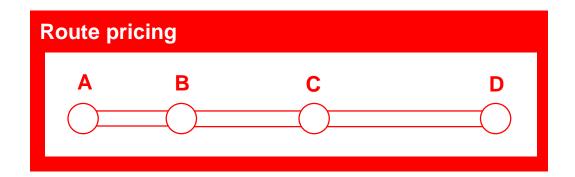

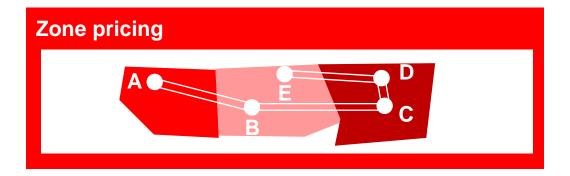

Customers no longer have to deal with complex product-range structures

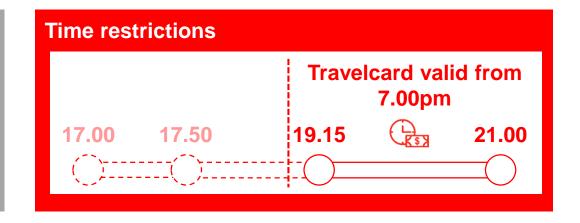

Combining different tariff systems is not a problem; pricing inconsistencies are eliminated

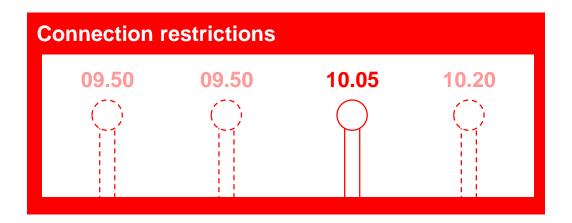

Today

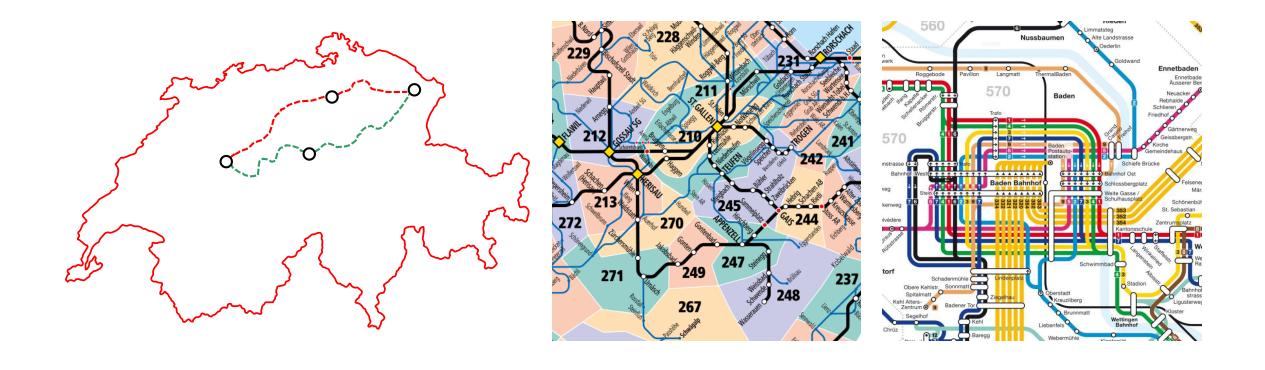

Tomorrow?

No need to work out and state the exact route in advance

Together as one – the "Swiss way"

Travelcards for travel on all national and regional services

Through tickets available everywhere

SwissPass – the all-in-one ticket

Harmonised standards

NOVA – the mobility platform of the future

Standardised customer information

Appreciate the Swiss travel system. Visit Switzerland and try out our public transport services
