可持续设计峰会

Shaping a sustainable
future by design

21-23 September 2023
Beijing Exhibition Center
www.sustainabledesignchina.com

Why a Sustainable Design Summit for China?

Ensuring a sustainable future is the biggest challenge we face today and one in which design across all its sectors plays a significant role. Architects and designers are the starting point for building development and therefore have an inherent responsibility to embed positive environmental and social impact and circular strategies into building design, as the built environments being developed today are going to create our future tomorrow.

The **Sustainable Design China Summit** was successfully launched in 2022, providing a unique platform to showcase sustainable design innovations, green technologies, products, systems and circular strategies within the global design industry. **September 2023** will see the return of the **Sustainable Design China Summit** at the **Beijing Exhibition Center** with exciting new themes and an ever stronger line-up of speakers, ready to showcase a plethora of exclusive launches from leading material design brands.

01

02

A Summit for Sustainable Design

The **Sustainable Design China - Summit** aims to explore the design world through a sustainable lens, shining a spotlight on innovative solutions and material use for the built environment, circular regenerative strategies and ground-breaking net-zero design concepts that have new performance led systems embedded within the design process to guarantee real, sustainable innovation.

It is China's leading meeting place for A&D, Interiors and development professionals to exchange ideas and discuss the latest developments around sustainable design. Drawing on our unrivalled Forum programme attracting world-class speakers, leading research and development experts will gather to understand the latest ideas, policy, services, products, solutions and industry standards and meet the experts in sustainable design and development.

Stefano Boeri
Italian architect, Urban planner, Founding partner of Stefano Boeri Architetti. President of Triennale Milano, curator, critic and educator.

Allan Zhang
SXTD CEO

Chris Lefteri
Materials Designer and Curator

Paul C Hutton
Principle, Director of Regenerative Design & Chief Sustainability Officer, Cuningham Group

Bruce Chong
Director, Climate and Sustainability, Arup

Shuhei Aoyama
B.L.U.E. Architecture Studio Founding Partner, Principal Architect

Robert Greenwood
Partner MNAL/Partner, Managing Director Asia, Snohetta

Xin Liu
Professor of Academy of Arts and Design, Tsinghua University

Dr. Yibo Xu
SBA China Partner/ Principle Architect, Studio Director, 1st Grade Registered Arch., P.hd Politecnico di Milano

Ethan Wang
Architect, GIG Leader, Woods Bagot

Hong Kian Lim
Surbana Jurong, North Asia CEO

Chen Xu
China Academy of Building Research Co. Ltd,EHS Department

Jiang Tao
Leader of LWT Greater China

Alex Sun
Vice President, Envision Digital/GM of Carbon Management Business/Chief Sustainability Officer

Chuan Fan
Ellen MacArthur Foundation (UK) Beijing Representative Office Project Manager for Learning and Design

Hansong Sun
White Peak, Director of Sustainability

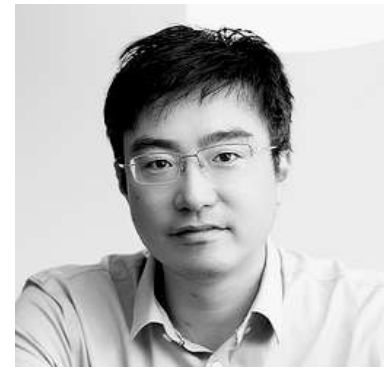

Selina Du
Technical Director, BRE China

Dayong Sun
Founder, Penda Studio Architects

Susan Rao
Associate Director, Arup

Wei Gao
ZedFactory, China partner

Sustainable Design China Summit

Option 1 - Shell Scheme

Fully built Shell scheme stands for materials and products exhibitors, **9m²**, the cost per stand is **40,000 RMB**.

Includes a fully built stand with **shelving**, **standard lighting** and **carpet**.

Shell Scheme Stand Price: 40,000 RMB

Option 2 – Space Only

For those exhibitors taking a bigger space and building their own stands, the charge will be **3,700 RMB/m²**.

Exhibitors also have the option to upgrade to **Gold sponsor status** for **250,000 RMB** to include a **40m²** stand space.

Space Only Stand Price: 3,700 RMB/m²

14

6 Forward-thinking Themes

1 Designing A Sustainable World

- Sustainable City & Communities
- Sustainable Lifestyle
- Case Studies for Sustainable Development
- Urban & Rural Development

3 Climate Changes Everything

- The 1.5°C Challenge
- Green Energy, the Essential Tools for Reaching Net Zero: Solar and other Renewables
- Incorporating High and Low Tech Solutions into Projects
- Partnering with Renewable Energy Companies

5 Nature by Design

- Design Principles Inspired by Nature
- Biophilic Design ecosystem
- Biomimicry
- Ecological Design
- Materials Ecology

2 Circular Design Thinking

- Regenerative Design Actions for A&D
- Circular Economy within the Neighbourhood
- Circular Economic Strategies for Clients

4 On the Path to Net Zero

- Exploring What It Takes to Create a Net Zero Carbon Property
- The Net Zero Carbon Hotel
- Carbon Neutral Construction
- The Importance of Environmental, Social, Governance (ESG) in Design and Development
- Meeting the Standards - Targets and Regulations

6 Building Sustainability & Green Design

- A Material Choice. Sustainable Materials, Green Product Design and the Construction Materials Pyramid
- Materials Lab - The Curator's View
- Learning from Adjacent Sectors
- What Can Developers, Designers and Architects Learn From Product Design, Packaging Design and Fashion?

15

6 Webinars

Led by the thought leaders, innovators and pioneers of sustainability in the world of architecture and design, the Sustainable Design China Summit partnered with influential media partners including **Wallpaper***, **LOHAS**, **Design 360**, **UED**, **Urban China** and **IDEAT** to present 6 design webinars from June to September 2022, focusing on the core themes of the summit. The webinars provide the platform where the design industries can discuss the issues, actions and solutions that will enable us to deliver a more sustainable future.
