

AIGP Health

Making Healthcare Serve Its Purpose.

Clinical Risk Management Infrastructure for Southeast Asia

10 MINUTE PITCH FOR HEALTHTECHX ASIA

Presented By: Sheetal Doshi (MSc, MBA)

Co-Founder and CGO of AIGP Health

The Founding Team

CO-FOUNDER & CEO

Dr. Anindita Santosa

Practicing Rheumatologist, Allergist & Immunologist

Navigated medico-legal complexity of high-uncertainty specialties

Built AIGP's clinical governance modules around real litigation scenarios and drug safety failures

CO-FOUNDER & CTO

Dr. Yudara Kularathne

Emergency Physician with AI & machine learning expertise

Emergency medicine: highest-risk, highest-litigation specialty

Builds safety systems that work under pressure

CO-FOUNDER & CGO

Sheetal Doshi, MSc. MBA

Patient Safety Advocate across Asia-Pacific. Healthcare Innovation Leader

Witnessed firsthand how patients - not clinicians - become the last line of defense when clinical risk goes unmanaged

Scaling AIGP's governance to 650M patients in Southeast Asia who currently have no guarantee their clinician has a safety net.

The Human Cost of Silence

Six weeks of wasted resources, unnecessary tests, and a human being left in limbo.

A missed Sarcoidosis diagnosis. A 27-year-old mother who lost her baby and kidney function. These aren't edge cases — they are the system.

50–60%

of adverse events in SEA are preventable

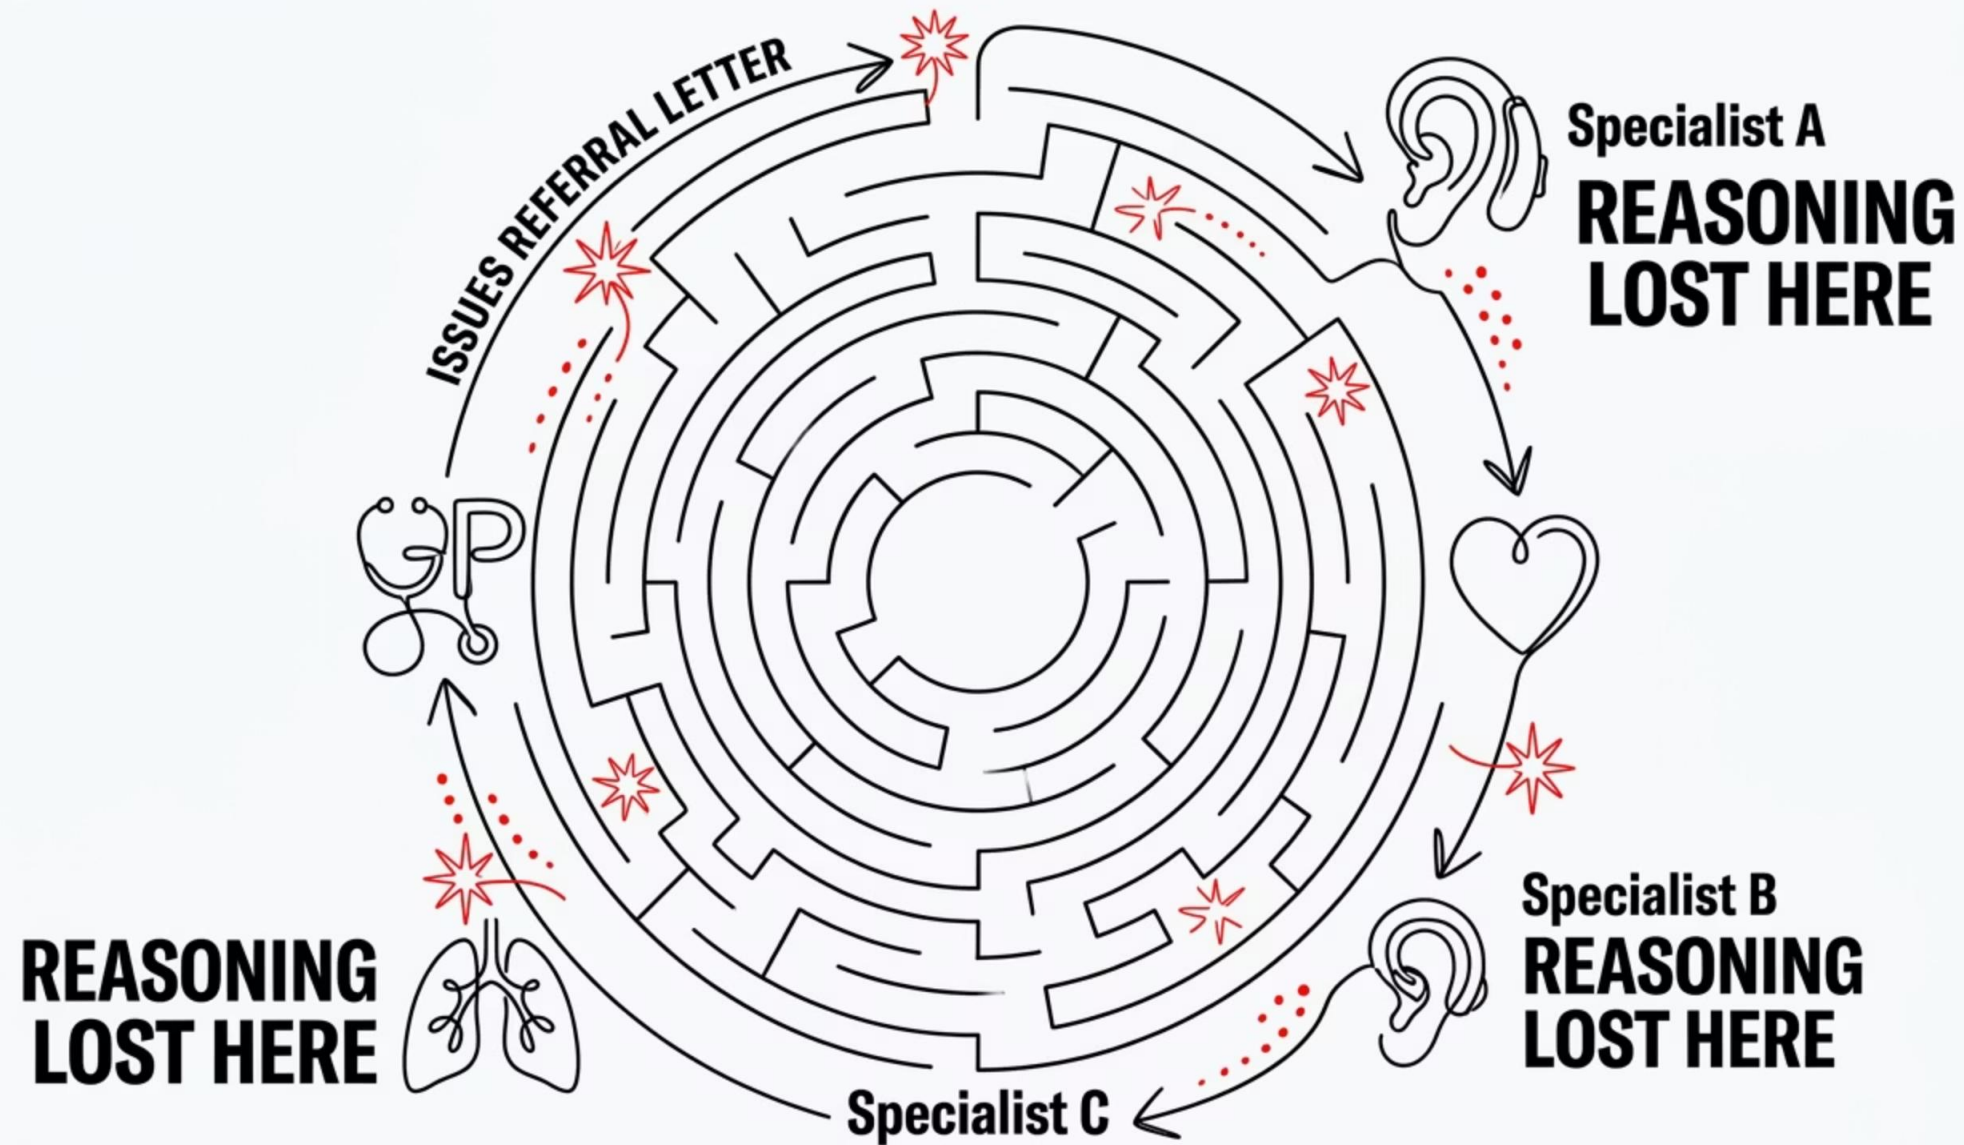

\$2.1B

in **avoidable costs** annually across the region

The Specialty 'Merry-Go-Round'

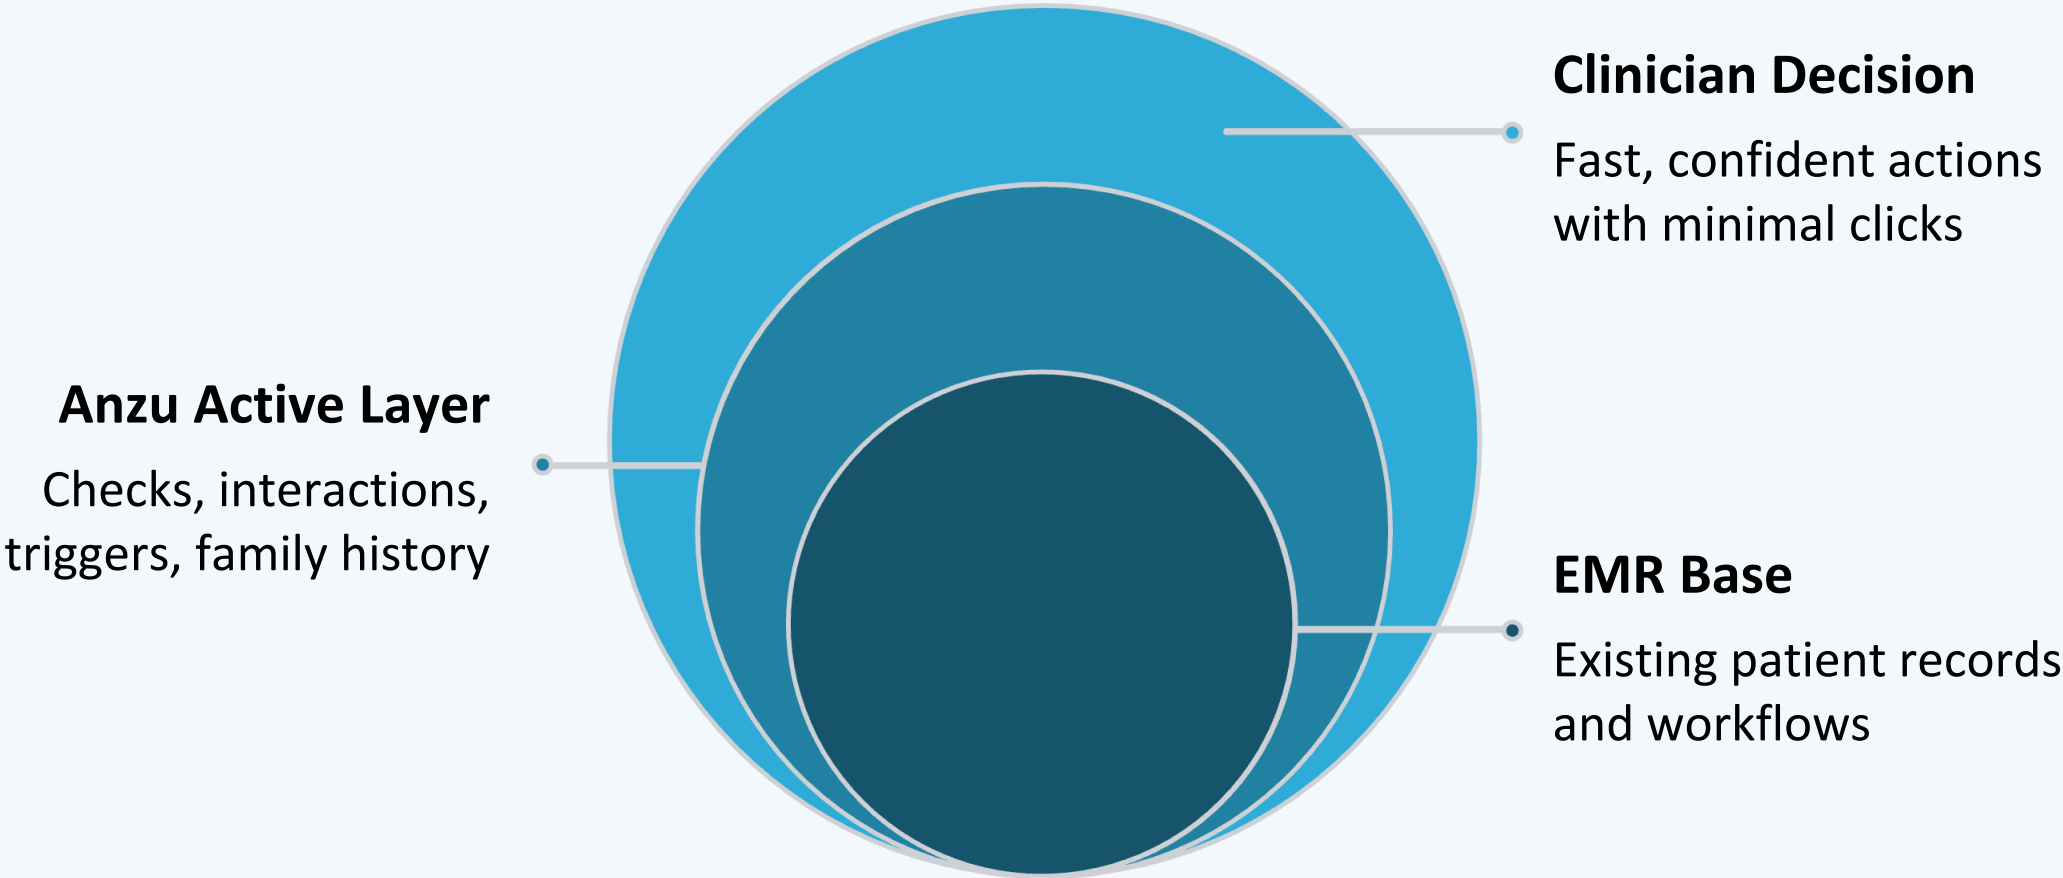

Clinical reasoning doesn't travel. Patients bounce. Time is wasted. Conditions worsen.

⚠ Every handoff is a gap. Every gap is a risk.

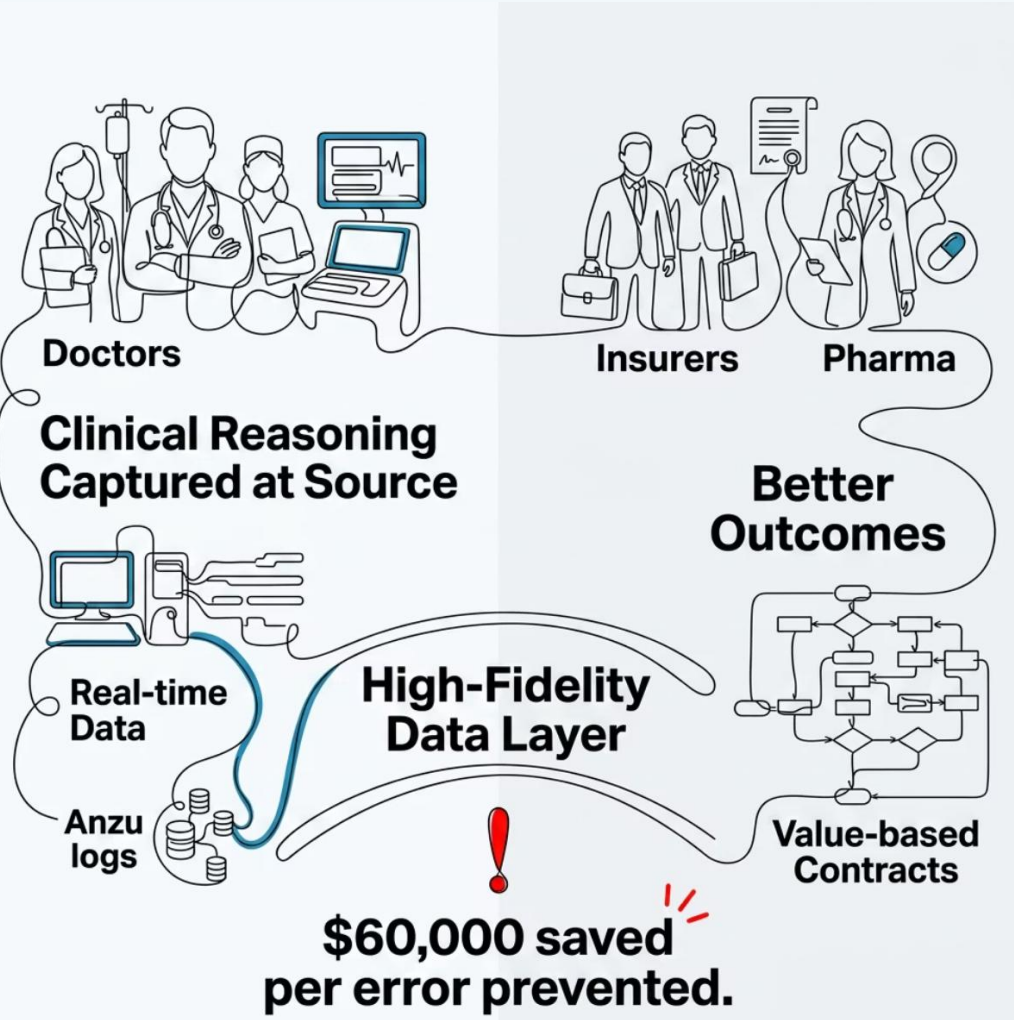

Introducing Anzu

The **Clinical Risk Management Infrastructure** — an Intelligent Compass active at the point of care.

Anzu captures reasoning at the source — so the next doctor always has the full picture, instantly.

Enabling Value-Based Care

Beyond Cost Savings

By capturing clinical reasoning at the source, AIGP enables insurers and pharma to finally move toward **true Value-Based Care**.

i We aren't just saving money — we are optimizing mankind's most limited resource: time.

Insurance
Risk models grounded in real outcomes

Pharma
High-fidelity real-world evidence

Health Systems
Measurable ROI on every prevented event

7 Days Recovered Per Error Prevented

7

Days of Bed Space

recovered per prevented clinical error

\$60K

Saved per Error

in inpatient care costs avoided

1,000+

Live Patients

Singapore & Australia — TRL 7

0

Adverse Drug Events

Recorded across all live deployments to date.

The Patient Impact

We don't settle for "wait and see." We replace it with **know and act**.

➔ **Zero Delayed Diagnoses**

Systematic checks catch what fragmented care misses

➔ **No More "Tuesday vs. Thursday"**

Care quality no longer depends on who is on shift

➔ **Every Junior Governed by the Best**

The senior consultant's brain — in every room, every shift

Our Governance Moat

HSA Class A

Singapore regulatory certified

SOC 2

Enterprise-grade data security

SEA-Native Intelligence

Southeast Asia is not a monolith. Anzu is trained on **regional cultural nuances, therapeutic areas, and linguistic variations** unique to this market.

Built *by* SEA healthcare teams. For the **SEA patient journey**. Not a Western export — a home-grown shield.

- ✔ Fast-tracking residency training — turning data-entry time into learning-at-the-bedside time.

**"I have a plan for you, and you are
in safe hands,"**

**The promise every doctor can now
make.**

Calling Healthcare Institutions

**The era of incremental improvement is over.
We cannot solve a 2030 specialist shortage
with 2010 software.**

Calling Investors

**Clinical soul. Regulatory moat. Commercial
engine. The fundamentals to scale across SEA.
Backed by a team built to solve healthcare's most
honest problem.**
