THE NATURE ISLAND

**Discover the Caribbean's
best-kept secret...**

Nature underpins the entire Dominica experience

Located between the islands of Guadeloupe and Antigua (north), and Martinique and St Lucia (south), Dominica remains a best-kept secret within the Caribbean. It's a natural paradise, offering endless adventures (for all levels) and inspiring a real sense of wonder.

The curious visitor will discover a pristine, tropical landscape – lush rainforests and 365 rivers, many cascading over cliffs into hot spring pools. Dramatic, little-visited beaches offer either volcanic black or powder-white sand.

The island is a botanist's wildest dream come true, with tropical flora and fruits. Spot vibrantly-hued hummingbirds, perhaps glimpse the rare Dominican parrot and snorkel close to shore to see brightly-coloured tropical fish.

With a rich cultural history courtesy of the Kalinago, the last indigenous people of the Caribbean, plus Dominica's musical heritage, with its many festivals, you'll enjoy a unique backdrop to your Nature Island holiday.
