# Why the Falkland Islands?

@andypollard

Windswept, remote, and rich with birdlife, the Falkland Islands are a world-class destination for birders and photographers.

Home to 61 breeding species of birds and up to 18 non breeding visitors, five types of penguins, and landscapes relatively unharmed by tourism; these islands are a haven for those who wait patiently for the perfect shot.

Home to an impressive array of marine life, with fourteen species of marine mammals recorded in local waters.

Visitors may spot Orcas, Commerson's and Peale's dolphins, along with Southern sea lions and Southern elephant seals, which gather in large numbers across the islands.

Fur seals are less commonly seen, and lucky observers may even catch a glimpse of the elusive Leopard seal.

With an abundance of wildlife and scarcely any people, the Falkland Islands are one of the few remaining places on Earth where nature flourishes.

Here, you can immerse yourself in the wild; sitting quietly among animals in their true habitat, and being able to witness their natural behaviour is delightfully enjoyable.

The Falklands is also rich in military history, where guests can delve into the islands' past through battlefield tours, memorials, and museums dedicated to both the 1982 conflict and World War II. Gear up for unforgettable world class fishing. Here, anglers will find some of the finest sea trout fishing experiences on the planet, set against a backdrop of unspoiled wilderness and stunning scenery.

Venture into the heart of the Falkland Islands and witness nature at its very best.
