Design Rigging Layout Nusantara Hall

RIGGING & LED/BACKDROP

Due to our building structure concern, the point for hanging rigging/truss and other hanging materials in the ICE ceiling hall must be in the 2 ton hanging point only, based on our structure consultant. If your design does not match our hanging point therefore the use of mother truss is a must and if there is any LED construction must meet our criteria to be allowed to proceed. We do really concern your rigging/truss, LED and stage design should fit with above requirement.
