

bamboo energy

The software platform of choice
for demand aggregation

The best platform to monetize flexibility

Optimal flexibility management • Day ahead trading & real time operation

bamboenergy is the leading SaaS platform

Embeddable SaaS platform

With the platform of the retailer and with the end customer.

Artificial intelligence algorithms

Allowing automation of flexibility management and portfolio optimization.

Easy, user-friendly interface

Helps you visualize and operate the SaaS.

Adaptable to legislative contexts

Platform able to adapt to all markets and their updates.

Ability to manage all types of assets

Of flexibility demand within your portfolio.

Low investment and low risk

Thanks to its proven technology and the team behind it.

Data collection and monitoring

Of the costs and earnings of the assets.

Customer-centric organization

Agile and focused on each individual client.

Bamboo Energy improves your internal operations, offering customised solutions depending on your specific needs and portfolio.

bambooenergy adds value to your business

Whether you are an energy retailer or independent aggregator, don't miss the opportunity to generate additional revenue streams with high return on investment.

Shopping centres, hotels, hospitals, and universities **create revenues** without impacting the occupant's thermal comfort.

Buildings or energy communities with PV panels and electric batteries increase **return of investment** on these assets.

Industries **reduce their energy bill** and their carbon footprint.

Electric vehicles **optimize the charging strategies** to either create revenues or reduce costs.

We are your flexibility partner

- **SaaS architecture and embeddable platform** able to adapt to customer requirements and regulations whilst minimising customisation efforts.
- **Artificial intelligence** core reduces investment costs and allows customised solutions.
- The capabilities to manage a mix of several demand flexibility assets, **avoids asset discrimination**.
