DEMAND RESPONSE

Demand response is a sustainable financial stream for industrial and commercial businesses, that's unlocked by shifting your electricity consumption during times of peak demand.

Maximise Revenue

Are you getting the most out of your assets? By making your assets available for demand response, Sympower can ensure that you are maximising your cash flow.

Guarantee Efficiency

Sympower's services have zero impact on your production. Our engineers will identify how to maximise the value of your assets, without affecting the core processes of your business.

Create Stability

Demand response lowers the likelihood of unplanned power outages, and increases energy independence. Offering the flexibility of your assets helps ensure a stable grid for everyone who's connected.

Change Sustainably

As a B Corp, Sympower is dedicated to creating a sustainable future. By working with us, you are fast-tracking the energy transition towards renewables.

Save Costs

Relying on power plants during peak electricity demand can be costly. Sympower helps you to reduce your reliance on them by managing your energy effectively. This equals more savings on your energy bills.

Leading the way in

Demand-side Flexibility

across Europe

Shift your Energy to Earn More

sympower.net

At Sympower, we're accelerating the global transition towards 'zero emissions' by helping build smarter, cleaner renewable energy systems. We're helping hundreds of customers around the world unlock their flexibility. This means reducing both their energy costs and carbon footprint, while ensuring they're contributing to a 100% renewable energy system.

Global Reach with a Local Approach

100% Independent

As an independent aggregator we are as flexible as our services, easily adapting to local markets and country regulations.

Extensive Experience

Our team of experts bring global experiences from the most advanced energy markets in Europe.

Tech-Driven

Our proprietary platform is optimised for specific country regulations, for constantly evolving markets.

A Comlete Service

We handle every step from installation and activation, to monitoring and reporting.

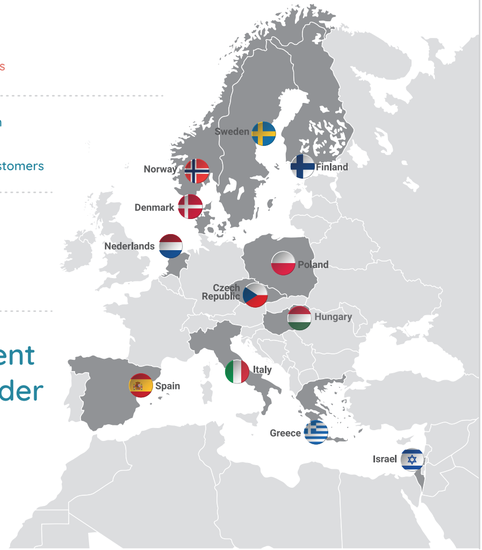
Over **100** team members

With **30** nationalities

Active in **12** countries

More than **150** global customers

Harnessing over **1GW** of capacity



The Leading Independent Flexibility Service Provider in Europe

Unlock Your Inherent Flexibility

Maximise your revenue, by managing your energy use with our flexibility services. Whether you're an industrial sawmill or a commercial greenhouse, our proprietary software is built to enhance the value of your electrical assets.

Our 4-Step Solution

We tailor our services to your needs. That's why we offer 4 distinct flex-services to optimise your energy use. We provide you with the technical expertise, while you stay in control.

FlexScan

Our technical engineers provide expertise and insight to determine the flex opportunities and value of your assets.

FlexConnect

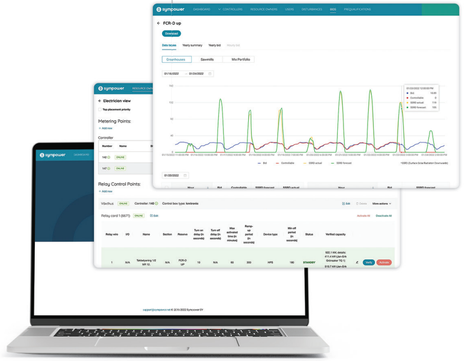
We connect, configure and operate your assets by linking them to our platform.

FlexPortal

Our platform provides you with detailed insights, real time reporting and resource management.

FlexManagement

We create value for you through the flexibility of your assets via daily management, forecasting, bidding and optimisation.



End-To-End Solutions So That You Stay Connected

Our Growing Areas of Expertise

- Data Centers & Crypto Currency Mining Servers
- Battery Energy Storage
- Renewable Energy
- Wood Processing
- Pulp & Paper
- Food Processing
- Hotels & Commercials Buildings
- Chemical & Pharmaceutical Production
- Greenhouses
- Water Treatment Plants
- Metal Production
- Electric Mobility & Transportation

AIR CONDITIONER · BATTERY · CHP · CRUSHER · CRYPTO MINER · E-BOILER

FAN · FREEZER · FURNACE · LIGHTING · PUMP · STIRRER

Success Stories

"All we have to do is click a button and Sympower can manage our systems. Then 2 MW of power will be immediately shut off. It's as simple as that. All within a minute, and demand response is in action."

Peter Nillesen | Operations Manager, Getec.Park

"Sympower has been fast with implementation and support, so we could get everything ready on time. Both in tests and during operation, Sympower's system has worked as described and in a safe way."

Anders Lundquist | Production Engineer, Arctic Paper

"I wasn't aware of the environmental benefits of demand response at first. But after working with Sympower, it's something I want to share with my customers."

Hanna Helenius | CEO | Piltin Puutarha Greenhouse
