“ At Cuurios we believe that the Big Data hype is exactly what it says it is: a hype. ”

Leen de Graaf CEO Cuurios

The ideology behind

BIG DATA

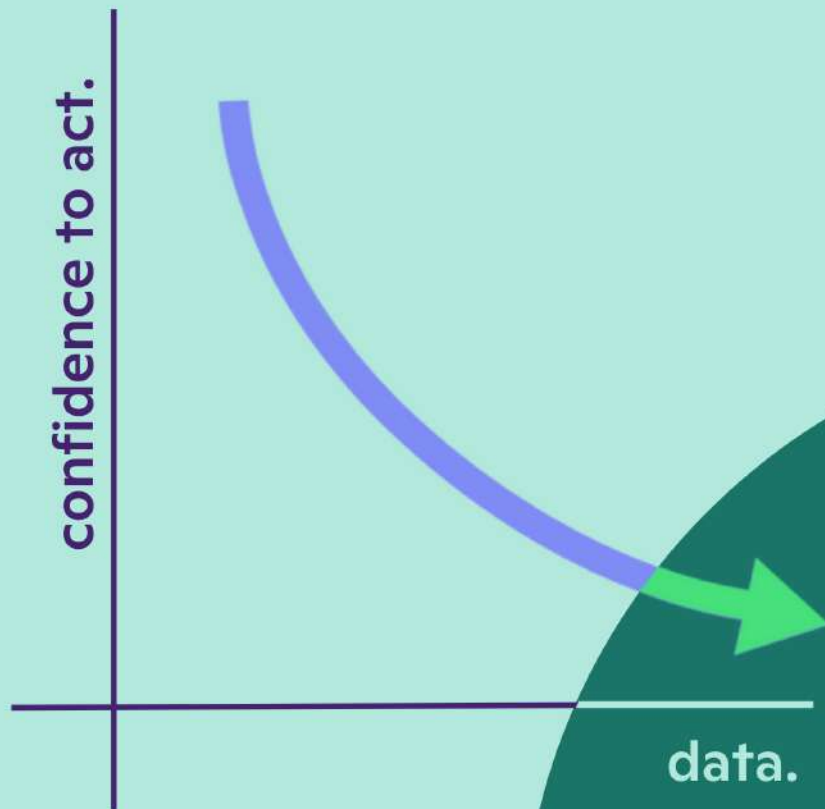

is

**THE MORE DATA
YOU COLLECT,
THE BETTER.**

This results in corporations drowning in data.

To put it bluntly:

**THE MORE YOU KNOW,
THE MORE YOU REALIZE YOU DON'T KNOW
AND THE LESS CONFIDENT YOU ARE TO ACT.**

It's a familiar feeling – having an abundance of information, yet struggling to discern where to begin solving your problems. This feeling of paralysis is one we at Cuurios find deeply concerning, especially when it burdens companies that possess the potential to channel their resources into innovation and creating a positive impact on the world.

That was the catalyst that drove our founders to action. After accumulating years of experience in IT consulting within the industrial sector, they identified the critical component missing in digital asset management and made the decision to establish Cuurios in 2018.

NOT. ANOTHER. DASHBOARD.

Dashboards cannot solve your data paralysis.

Dashboards only analyze and present data; they do not provide guidance on the next steps. Following up on notifications is still managed in traditional ways, involving calls, emails, Excel sheets, and other systems not designed for this purpose.

But that's where we come in.

Cuurios focuses on identifying the most relevant data for your workflows and generates appropriate actions. This is where the true value of data can be found. With this knowledge, you are ready to elevate your daily operations and achieve genuine optimization.

Our platform seamlessly connects your people, machinery, and actions with data. Clients often express that implementing our software feels like their data-congested brains finally receive the much-needed neurological wiring that drives action.

Finally, you understand what is happening.

Finally, you know what to do next.

Finally, you can act confidently.

We're disrupting the traditional IT approach.

Traditional IT

Focus on data
Directive
Replacing people
Yesterday's knowledge
Tailor made
Agnostic IT
Complex
Black box approach

Cuurios

Focus on workflow
Facilitating
Empowering people
Tomorrow's actions
Configurable SaaS solution
'Curious development'
Oversight
Transparent approach

We facilitate scalable changes.
Fueled by our trademark curiosity, we first understand how your assets affect your internal processes. Then we build you a well-oiled machine that caters to the specific needs of your operations.

We embrace open architecture.
Any datapoint, your asset management software, sensors specific for your machinery – we can tap into them and create appropriate actions for employees at any level of your organization.

We are modular.
Why attempt to create a black box that pretends to solve every imaginable problem at once? That is not who we are. We love securing partnerships with research institutes and companies that focus on one specific problem – and are amazing at solving it. We empower them through our platform, and you get a solution tailored to your specific challenge.

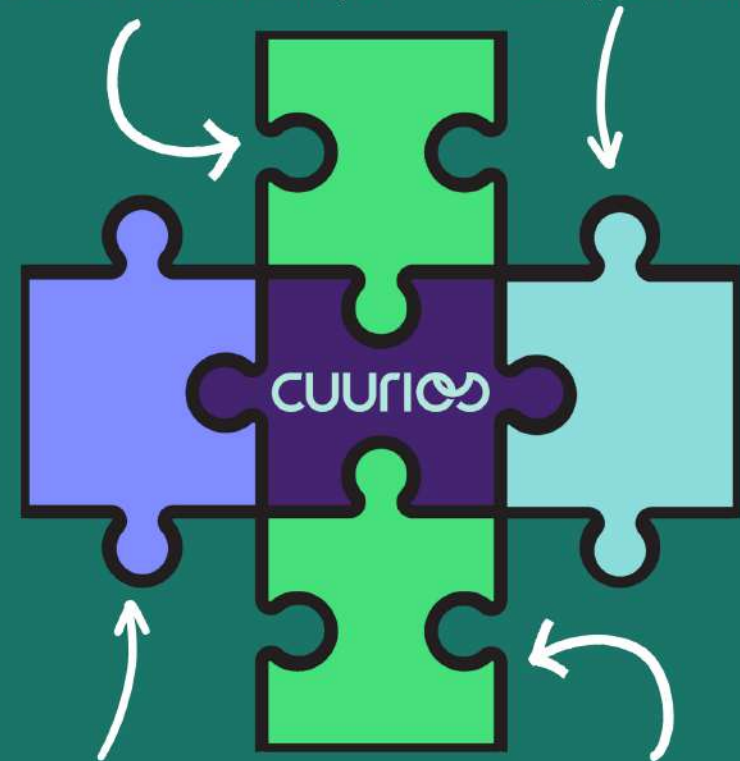

Asset Management.

Monitor asset real-time data and life-cycle.

Data wranglers.

Collect, process and display data.

Ticketing & Action Tracking.

Organize and manage actions.

Point solutions.

Dedicated to specific tasks.

Hear it from our customers

"Thanks to Cuurios, we truly digitalized our offshore platforms. To such a degree, that they are able to operate without permanent personnel."

"By applying Cuurios solutions we got the much-needed clarity on what we need to do, to make our workflows truly robust."

"Cuurios provided a fresh and different approach to our way of solving challenges."

Providing gas well operations teams with unique data insights, in order to produce at optimum levels and avoid asset failure.

Our software focuses on automatically detected issues and facilitates collaborative workflows for implementing suggested actions. Cuurios is capable of identify trends and define repair priorities.

It allows management to prioritize significant business gains while exploring opportunities for production efficiency.

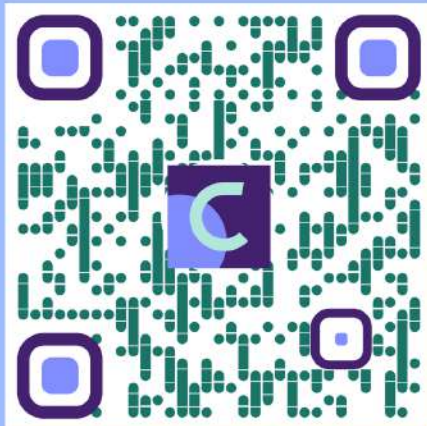

With the Cuurios platform your company knows what is happening with your assets in real time and able to manage them with confidence.

We understand that our approach to asset management may seem unconventional, and you might have many questions (one might even say you're 'Cuurios').

To get your answers, we invite you to book a meeting with us at:
