

*Flexible energy systems
Leveraging the Optimal
integration of EVs
deployment Wave*

1st General Assembly organized by enel*way

What is Flow?

FLOW is a Horizon Europe funded project framed in the 2Zero partnership ('Towards zero emission road transport'). It delivers user-centric and interoperable solutions to boost V2X possibilities that:

Why Flow?

The transport sector is responsible for 23% of EU CO2 emissions: for this reason the EU Parliament voted to ban new sales of fossil fuelled cars by 2035. A smooth and rapid uptake of EVs and their integration in the energy system requires both systemic and user-centric approaches.

FLOW in numbers

- 4 years
- 10M€ budget
- 600ktCO2/year in reduced emissions
- 1.3B€ in saved costs
- Local RES increased by 14%
- RES curtailment avoided by 4TWh

Pilot sites

Project activities are going to take place in a wide range of European pilots
5 demstration sites in 5 European countries

Menorca

Denmark

Rome

Dublin

Prague
