### SaaS Services to Your Clients

With our data management platform, you can generate additional recurring revenue from your customers.

■ Consumption Reports

■ Billing Data Export

■ Balancing Reports

■ Data Outage Detection

■ Alert Notifications

■ Metering Point

■ Network Health Analysis

# Upgrade Your Services with Our Network Health Analysis Module

## Effortlessly Analyze Data Telegram

Gain insights into the number of data telegram received, those intended for transfer, and any losses along the way.

## Analyze Network Strength Parameters

Ensure your network is optimally planned. Explore the need for additional gateways to enhance your data coverage

This functionality supports proactive network monitoring, anticipating potential issues and ensuring stable network operation.

## Benefit from our TurnKey Solution:

Hardware-agnostics solution transforms legacy infrastructure

One software account for different network types

Billing report export, non-revenue water detection, alerts, and other functionalities in our data management platform

Full network propagation study covering density, coverage, and stability evaluation

Network health analysis for the prevention of network issues

API integration for BMS/PMS and billing systems data integration

Consumer Mobile App for residential consumption monitoring

Troubleshooting to identify the real cause of disturbance sources (devices, network, software layers)
