

SPECIALIZED IN THE PRODUCTION OF WATER MEASURING INSTRUMENTS

Independent company at the fourth generation

> 100 YEARS OF EXPERIENCE

from MecTo mechanical meters to ElecTo smart meters for modern connected cities

30 certified test benches for metrological verification (DN 15 to DN 400 mm)

State-of-the-art integrated logistics for better customer service

Accredited laboratory ACCREDIA

Production in Italy and Germany with highly automated lines

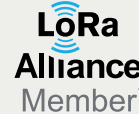

170 employees

INTEGRATED MANAGEMENT SYSTEM

- ISO 9001
- ISO 14001
- ISO 27001
- ISO 45001
- SA8000

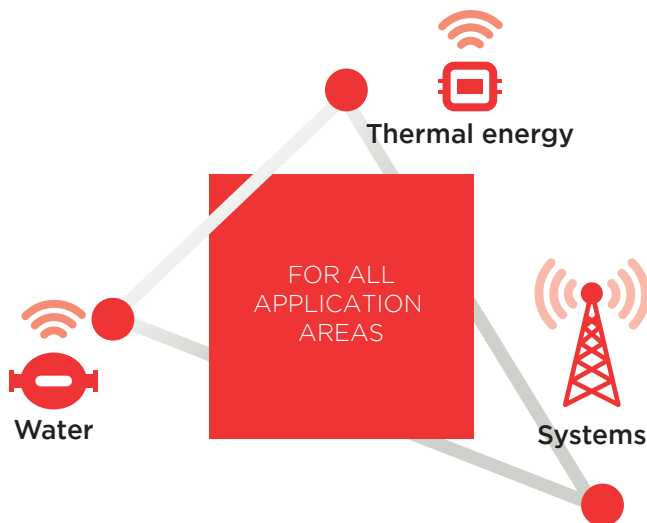

ASSOCIATIONS

HISTORY

- 1919**
Foundation and distribution of the meters of the Schinzel company in Vienna
- 1932**
Development of a proprietary product line and subsequent implementation of production lines
- 1950**
Consolidation of the product range and expansion of activities abroad
- 1993**
Horizontal factory transformation and Europe's first fully automated line for the production of water meters
- 1995**
Introduction of the first radio-read meters
- 2007**
Entry into the market of thermal energy meters
- 2015/17**
The new smart meters opened up the world of the IoT and released the ElecTo platform for electronic meters
- 2019**
Expansion of the plant and new automated lines
- 2021**
The first sustainability report in accordance with the GRI standards

PRODUCTS

Maddalena's meters help utilities and the submetering market thanks to:

- Features in line with recent European directives (metrological and health)
- Measurement efficiency up to +15% compared to older meters
- Flexibility in remote data communication with both mobile and fixed network reading systems
- Real-time communication of leaks and anomalies
- Optimization of distribution networks
- Energy savings
