Company Profile

MADE IN ITALY

B METERS has always conceived, designed and manufactured all of its products in its facilities. This is our philosophy. Independence and excellence have always made the difference for our customers.

A choice of excellence

B METERS

An Italian company that designs and produces all the instruments and accessories for water and heat metering.

.....
B METERS
qualities

The appreciation of our customers and the many product certifications issued by independent bodies – more than our words – are the best attestation of the quality of our work.

We are specialised in the private/residential sector, with constantly growing results.

We offer the market a wide choice, with complete and integrated solutions for water and heat.

We work with a 100% real and visible integration, so all our products are conceived, designed and manufactured in our facilities.

Integration means we can offer the market high-quality products and solutions at competitive prices.

We are innovative, constantly projected to the future, to reach a greater integration between products and monitoring systems.

We are a 100% independent company, which makes us fast, flexible and very customer-oriented.

We have the best lead times in the market for reliability and speed.

Reasons to choose us

Italian Talent — European Dimension

For over 30 years, we have been producing innovative and user-friendly products, **integrated solutions** and **remote reading systems** for water and heat meters, at competitive conditions.

We are **100% Italian**. We have within ourselves the **culture of quality** manufacturing and design, as well as the ability to customise and manage complexity.

We want to be an **independent player** and **reference** in the market of today and the **smart cities** of tomorrow.

Thanks to our know-how, experience and Italian tradition, today we are in a position of absolute importance in the **national** and **European** contexts.

1991

Establishment of B METERS & production of single jet with wet dial

1993

Single jet with dry dial production started

1994

Multiple jet with dry dial production started

1996

Woltmann production started

1998

Branch opening in Hungary

2000

New head office

2001

Branch opening in Romania

2002

Branch opening in Spain

2003

Branch opening in the Czech Republic

2006

Branch opening in Poland

2008

1st generation M-Bus wireless modules production started & construction of the 3rd production plant

The numbers of B METERS

(Data referring to year **2023** only)

2,000,000 Water meters_ **600,000** Communication modules_
110,000 Heat meters_ **170** Employees in Europe_
90 Countries served_ **100** Employees in Italy_ **66** Million turnover in Europe_
41 Million turnover in Italy_ **6** Branches owned_ **3** Production sites in Italy

2009

1ST generation wired
M-Bus modules
production started

2012

Heat allocators
& 2ND generation
M-Bus wireless
modules production
started

2013

Branch opening
in Sweden

2014

Entry into the OMS
group & 3RD generation
M-Bus wireless
modules production

2015

Production of the
first made in Italy
heat meter started

2017

Development
of the data
reception
infrastructures

2018

Production of
inductive sensor
modules and
development on the
IoT connectivity

2019

Branch opening
in UK and
digital single
jet production
started

2020

Ultrasonic
water meter
production
started

2022

4TH generation
thermal energy
meters production
started

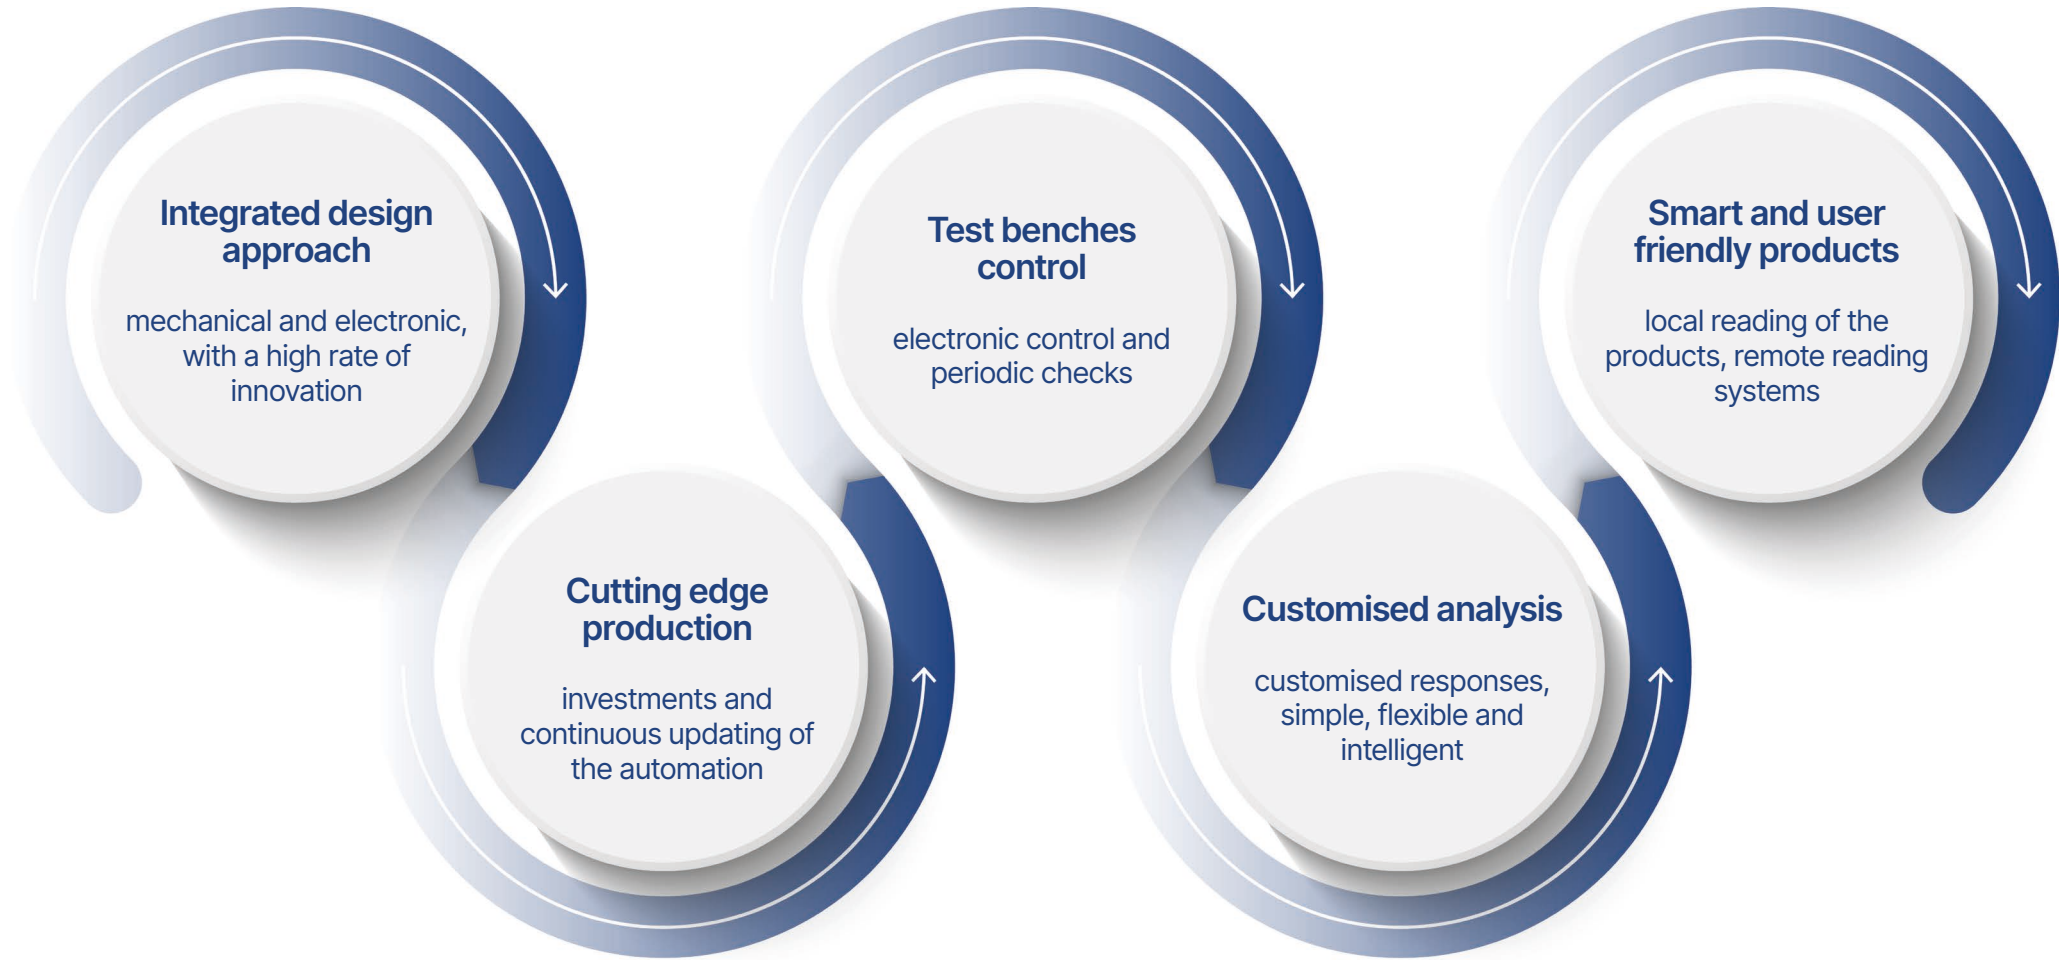

2023

wM-BUS
+ LoRa
Smart
Meters

Our working method

B METERS workflow Integration and innovation

A proprietary and exclusive method, the integration of the entire production process: 5 steps to achieve excellence. From personalised analysis on the customer's needs to the commissioning of the product on the network, our virtuous cycle is completed with precise, timely and widespread assistance and control.

B METERS solutions

Integrated intelligence for today's and tomorrow's needs

The requirements of our customers, whether they are individual users or service companies and industries, are those of a world that is increasingly becoming integrated and concerned about controlling resources and limiting waste. Our integrated solutions, measuring, recording, and transmitting consumption

data are extremely clear and efficient, as they are providing data to customers for analysis and management. A true infrastructure that also even allows our customers, without any manual operation, to provide additional services such as monitoring, billing and loss alarm.
