Cybersecurity

- Near - edge security
- Centralized management but distributed security
- Dedicated Thread Intelligence,
- Zero Day attack prevention
- Integration AI models.
- XDR: Extended detection and response.

Advanced Networking

- **Smart metering:** Complex deployments in remote and unattended locations.
- **Automation:** Guaranteed reliability, performance and security in the development of complex Smart Grids deployments.
- **IT/OT Management**: Easy gateway device Configuration process, control, security, troubleshooting and management for Smart Grid deployments.
- **EV Charging**: Easy gateway device Configuration
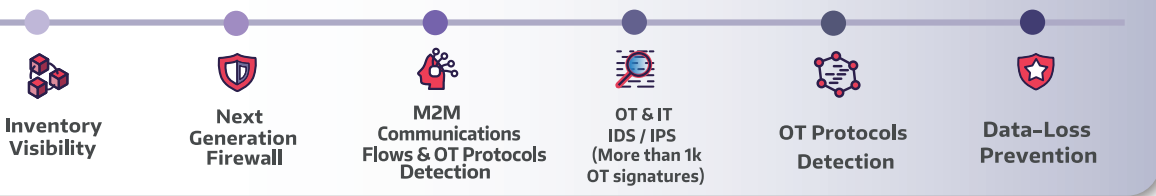

Cybersecurity & comunication for Smart Grids
