At INESC TEC we harness cutting-edge digital models, champion sustainable scientific transformation, develop trustworthy technology, and tackle the extreme.

Our pillars towards the future are:

- **Rigour and excellence**
- **Freedom to create and think**
- **Integrity, transparency and ethics**
- **Creativity, boldness, curiosity and innovation**
- **People-centredness and inclusion**
- **Collaboration**

INESC TEC is a private non-profit research association, with Public Interest status, dedicated to scientific research and technological development, technology transfer, advanced consulting and training, and pre-incubation of new technology-based companies.

Present in seven sites in the cities of Porto (headquarters), Braga, Vila Real and Madeira, an office in Brussels, and with more than one thousand collaborators, INESC TEC acts from knowledge generation to science-based innovation, and performs collaboratively in search for a more sustainable, responsible, and improved world.

INESC TEC aims at exceeding performance in research, while considering its social, environmental, and economic impact, with a commitment to the scientific and technological contribution to foster pervasive intelligence.

Being an institution that operates at the interface between the academic and business worlds, bringing academia, companies, public administration, and society closer together, INESC TEC generates new knowledge as part of its research, and leverages that knowledge in technology transfer projects, seeking impact through both value creation and social relevance.
