## About Us

EDF International Networks offers a unique expertise on distribution networks and advanced metering infrastructure, capitalizing on the EDF group's experience in electricity distribution. Our scope of expertise ranges from conventional DSO activities to network digitalization and energy transition management.

We provide technical and commercial solutions that focus on cost/benefit, driving sustainable performance improvement and value creation through three business approaches:

### **1. IMPROVING POWER QUALITY**

Control and improve the quality of the electricity supply to satisfy all stakeholders and meet the KPIs set by the national regulator and the Ministry of Energy.

### **2. MAXIMIZE COMPANY REVENUES**

Reducing losses, improving the collection process and having a regulatory framework compatible with the creation of value for the company.

# +21

countries trust us to bring our expertise and tailored solutions to their projects worldwide.

### **3. OPTIMIZE NETWORK INVESTMENTS TO SUPPORT DEMAND GROWTH AND NEW USES**

Provide the expected level of services while optimizing the amount of investment and efficiently integrating DER and EV.
