

Automation

Empowering Distribution Systems
Operators to streamline
automation projects.

A photograph of a man in a blue shirt sitting at a desk with multiple computer monitors in a control room. The image is overlaid with a green tint.

Smart Grids Automation is
now essential for DSOs to face
the energy transition
challenges, such as network
management and investment.

Our value proposal

EDF International Networks has developed expertise in supporting Smart Grids programs and offers the following services:

- Organization of study tours to discover innovative solutions developed by the French DSO;
- Implementation of a detailed roadmap to provide guidance in your projects;
- A 360° degrees support for your automation project.

“ With EDF International Networks support, we **saved many years** on our FLISR and RTU deployment program for network automation. ”

Gonzalo LOPEZ - Head of Network Management at UTE, Uruguay

- Access to experts from the French DSO with high level of expertise
- Leverage the latest knowledge from EDF Group in innovative areas (DERMS, EV, etc.)

Example of an achievement

In Serbia, EDF International Networks supports its client in the implementation of its new ADMS, supporting every phase from initial negotiations to full operational deployment, ensuring seamless integration and success.
