

**ACCURATE, RELIABLE, AND
COMPREHENSIVE**

Load Forecasting Specialists

TESLA is the leading provider of demand forecasting solutions in the energy industry, with over 30 years of experience, and used by traders in nearly every market across the globe.

Serving Energy Traders Across Europe

Experts Who Have Done It

With over 30 years of experience, TESLA's unique model produces the most accurate forecasts in the industry.

Our Markets

The forecasts provided are split by geographic area and include most of Europe (except BH, MK and KO) for power and ES, FR, DE, UK, NL, BE, CH, IT and AT for gas.

Proven Results

With historical forecasts continuously archived and a live evaluation on the table, it's never been easier to verify load forecast performance.

No Downtime

TESLA's dedicated analysts and engineers constantly update their technology to ensure the reliable delivery of those forecasts where and when you need them.

TAILORED FOR TRADERS

Load Blending

Blended load forecasts resulting in higher accuracy

Weather

Multiple weather scenarios that quickly adjust to unexpected weather changes

Timely Updates

Forecasts updated every hour

Easy Integration

API to feed forecasts into your existing systems and tools

Minimal Overhead

Web based solution makes it quick to evaluate and implement

Time Horizons

Hourly forecast granularity at 14 day horizon, longer term horizons up to 1 year+

TESLAWeb Portal

To allow traders to perform tasks quickly and efficiently, one of TESLA's features is a web portal with functionality including:

The screenshot displays the TESLAWeb Portal interface. On the left, there is a sidebar with navigation options: Model Selection, Baseline Forecast, Temperature Sensitivity, Weather Risk, Comparable Days, and Export Function. The main area features a line graph showing a 7-day forecast horizon for TESLA Germany. The graph plots Load (Y-axis, 37500 to 72500) against Time (X-axis, 2024-02-12 to 2024-02-18). A red line represents the actual load, and a blue line represents the forecast. The forecast shows a peak of 69283.30 and a minimum of 65550.25. Below the graph is a detailed spreadsheet with columns for Time, Load, and other metrics. The spreadsheet data is as follows:

| Time | 2024-02-12 | 2024-02-13 | 2024-02-14 | 2024-02-15 | 2024-02-16 | 2024-02-17 | 2024-02-18 |
|---------|------------|------------|------------|------------|------------|------------|------------|
| 01:00 | 45665.00 | 49028.75 | 45153.70 | 48156.20 | 48117.00 | 48787.50 | 42823.30 |
