

Testing the feasibility of a Collaborative GCC DNA Portal to assist in countering terrorism

Captain \ Ahmed Mohamed Abdullah Zayed

- ***Under what condition would a collaborative DNA portal among GCC countries be feasible ?***

1. The portal should not contain any personal information
2. Agreement on the IT infrastructure between GCC
3. Establishment of laws and regulations
4. A cost and benefit analysis to determine how much will it cost to create such a portal
5. A mutual agreement between GCC countries on the portal

Educating the Public

Culture and Its Impact

- What we neglect ?
- What we should focus on ?
- How can we overcome it ?

Recommendation

- An in-depth study should be made on the availability of the IT infrastructure in the GCC countries and what will be required to establish a link.
- A cost benefit analysis study to determine the cost and benefits that will be gained from the portal
- Discussion of the proposed portal between ministries of interior of all GCC countries

THANK YOU
