

Hand Carry at Los Angeles Convention Center

Approved During Hand Carry Operations:

There is no temporary parking at the front of the Los Angeles Convention Center. Exhibitors can park in the parking garage if space allows and hand carry small materials in. Union laborers will monitor move-in and if they see anyone using equipment they will send them to the loading dock. Exhibitors who need equipment (cart, dollies, etc.) to move their materials must go to the loading dock and use the cart service. No dollies/carts will be allowed from the parking garage to the front of the hall.

Cart Rate

- \$152.25 round trip (includes one laborer, one cart, one trip)
- Cartload services are provided for personally owned vehicles. Maximum weight is 200lbs.
- Vehicles that don't qualify for this service and will be billed regular material handling rates.
- Two people must be present. One to stay with the vehicle and one to accompany the product to the booth.

Mobile Unit Spotting Fee

- \$446 per unit for round trip spotting fee. This charge is for any freight that is on wheels and being rolled onto the show floor. All freight being rolled in will be charged a spotting fee. No exceptions. Additionally, boxes, packages, etc. cannot be stacked on top.

POV – Privately Owned Vehicle

- Privately owned vehicles can drive up to the loading dock parking area at which, the freight team will determine if your freight qualifies for POV/Cart service or if material handling applies. Exhibitors who have a small item and can take it to their booth without assistance are able to do so but multiple items or trips will require cart service. Any exhibitor that uses union labor or drives up to the loading dock bays will be charged Material Handling.
