RexTooth Studios Booth: 1649

Sauropods - the famous long necked dinosaurs - didn't have the frills, crests, spikes, horns, claws, clubs or teeth of many of the other famous dinosaurs. Instead, they wow us with their size. The biggest of these astounding animals stretched to more than 120 feet long and weighed over 70 tons! Join award winning author/illustrator Ted Rechin (Tyrannosaurus rex, Sue: Welcome to the World of Tyrannosaurus rex) and Dr. Cary Woodruff as they unravel the mystery of the sauropods.
