

# 14:08 Three-dimensional Problems continued

## Exercise

- 1 The figure shown is a cube.  
Find the size of:
- $\angle CFG$
  - $\angle CEG$ .

In this exercise, give answers for angles to the nearest minute.

- 2 The figure shown is a rectangular prism.  
Calculate the size of:
- $\angle HAD$
  - $\angle CDB$
  - $\angle HBA$
  - $\angle HBD$ .

- 3 The figure shown is a right square pyramid. Calculate:
- the length of  $PR$  (to 3 significant figures)
  - the height  $OT$  (to 3 significant figures)
  - the size of  $\angle TPQ$
  - the size of  $\angle TPO$
  - the size of  $\angle TMO$ , where  $M$  is the midpoint of  $QR$ .

The figure drawn is a rectangular prism. Given that  $\angle VXZ = 21^\circ 43'$ , calculate the height of the prism,  $VZ$ , to the nearest millimetre.

- 5 The figure is a rectangular prism where the ratio of the sides  $EF:EH:EA = 3:2:5$ . Find:
- the angle between  $AF$  and  $EF$
  - the angle  $DF$  makes with the base  $EFGH$
  - the angle between the plane  $ABGH$  and  $EFGH$
  - the angle  $AG$  makes with the plane  $BCGF$

The figure drawn is a right triangular prism where  $KL \perp LP$  and  $\angle KPL = 17^\circ 35'$ . Find:

- the length of  $KP$  (to the nearest millimetre)
- the size of  $\angle KPN$ .

- 7 A flagpole stands at one corner  $P$  of a level square field  $PQRS$ , each side of which is 120 m long. If the angle of elevation of the top of the pole from  $Q$  is  $13^\circ 19'$ , find:
- the height of the flagpole (to the nearest centimetre)
  - the angle of elevation of the top of the pole from  $R$ .

- 8 A right regular hexagonal pyramid has base edges of 9 cm and a height of 12 cm. Find:
- the angle one of the slant edges makes with the base
  - the angle one of the triangular faces makes with the base.

### 14:08 Three-dimensional Problems

- 1 a  $45^{\circ}0'$       b  $35^{\circ}16'$
- 2 a  $33^{\circ}41'$       b  $26^{\circ}34'$       c  $31^{\circ}0'$       d  $16^{\circ}36'$
- 3 a 11.3 cm      b 10.6 cm      c  $70^{\circ}32'$       d  $61^{\circ}52'$       e  $69^{\circ}18'$
- 4 3.4 cm
- 5 a  $59^{\circ}2'$       b  $54^{\circ}12'$       c  $68^{\circ}12'$       d  $29^{\circ}7'$
- 6 a 16.6 cm      b  $38^{\circ}4'$
- 7 a 28.40 m      b  $9^{\circ}30'$
- 8 a  $53^{\circ}8'$       b  $57^{\circ}0'$
