

# WORKSHEET 1 PROPERTIES OF 2D FIGURES - CHAPTER 7

WHY DO FIREMEN WEAR RED BRACES?

---

1 Name a plane figure with the given number of sides. (a) 4 (b) 5 (c) 6

2 which one of these 3 figures is a regular figure?

[A]

[B]

[C]

3 Identify each of these triangles as either scalene, isosceles or equilateral.

(a)

(b)

(c)

4 Calculate the size of the angle marked ●

(a)

(b)

5 Name the quadrilateral shown

(a)

(b)

(c)

6 Answer True or False to these statements

- (a) The diagonals of a parallelogram are equal
- (b) The diagonals of a rhombus are equal
- (c) The diagonals of a rhombus are perpendicular.

7 Answer True or False to these statements

- (a) All squares are rectangles
- (b) All parallelograms are rhombuses
- (c) All trapeziums are parallelograms

8 Name the type of triangle that has the following number of axes of symmetry.

- (a) 1
- (b) 3
- (c) 0

9 Name 3 types of quadrilaterals that have at least 2 axes of symmetry.

10 What is the order of rotational symmetry of:  
 (a) A regular pentagon                      (b) A regular hexagon                      (c) A regular octagon.

11 Which quadrilateral is identified uniquely by this property?  
 (a) 2 pairs of opposite sides parallel  
 [A] Trapezium    [B] Parallelogram    [C] Square                      [D] none of these

(b) All sides equal  
 [A] Rectangle    [B] Rhombus                      [C] Trapezium                      [D] none of these

(c) All angles 90°  
 [A] Rectangle    [B] Rhombus                      [C] Trapezium                      [D] Kite

12 Here are 4 tetrominoes (shapes made up of 4 squares). Draw the missing fifth one.

13 In order for a regular shape to tessellate the plane, it is necessary for:  
 [A] Each angle to be a factor of 360°.  
 [B] The sum of the angles to be 360°.  
 [C] No angle to exceed 90°.  
 [D] All sides to be equal.

14 A semi-regular tessellation is made up of:  
 [A] Irregular figures.  
 [B] A mixture of regular and irregular figures.  
 [C] Half regular and half irregular figures.  
 [D] A mixture of different regular figures.

15 How many sides has a decagon?

Answers:

A	D	E	F	G	H	I	L	N
B	25° 62°	5 6 7	Quadrilateral Pentagon Hexagon	Equilateral Scalene Isosceles	D	False False True	A	Isosceles Equilateral Scalene

M	O	P	R	S	T	W
D	Square Trapezium Rhombus	True False False	Rhombus Rectangle Square	B B A		10

12 5 11 12 5 7 12 14 10 6 9 7 2 8 12 11 1 9 5 14

1 2 13 13 6 8 3 4 5 15 8
