learning resource pages

We've created special learning resource pages on our website, full of fascinating facts and figures, so kids can discover more about the creatures, continents, animals, states, legends and more that they're colouring in!

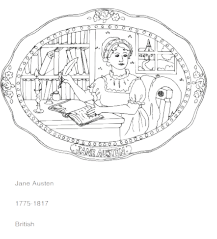

heroines of history

Queen Elizabeth I
1533-1603

1775-1817

Queen Elizabeth I was born in 1533 in Greenwich, London. She was the only daughter of Henry VIII and Anne Boleyn. She became queen in 1558 and ruled for 45 years. She is famous for her reign of peace and prosperity, known as the Elizabethan era.

Jane Austen
1775-1817

Jane Austen was born in Steventon, Hampshire, in 1775. She was an English novelist and writer. Her most famous works are *Pride and Prejudice*, *Emma*, and *Persuasion*. She died in 1817.

Cleopatra

Cleopatra was the last active pharaoh of the Ptolemaic Kingdom of Egypt. She is famous for her intelligence and her relationships with Julius Caesar and Mark Antony. She died in 30 BC.

Joan of Arc
1412-1430 (est)

Joan of Arc was a French peasant girl who led French armies to several important victories during the Hundred Years War. She was executed in 1431 but was later declared a martyr and canonized as a saint in 1909.

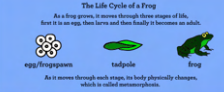

pond life

POND LIFE

All of the organisms found in a pond have a common ancestor. Over time, they have adapted to their environment. This is called evolution.

The Life Cycle of a Frog

As a frog grows, it needs through three stages of life. First it is an egg, then a tadpole, and finally an adult frog.

The Life Cycle of a Dragonfly

There are three stages in the life of a dragonfly, an egg, a nymph and finally an adult.

The Life Cycle of a Tadpole

Tadpoles are in the larval stage, they cannot breathe on their own and they need to breathe through their gills.

When the eggs are ready to hatch, nymphs will emerge.

A nymph is a small, wingless creature with a crusty body on its back that lives in the water. It has long legs and antennae. It eats other small animals.

As a frog grows, it needs through three stages of life.

First it is an egg, then a tadpole, and finally an adult frog.

When a tadpole is ready to mate, it usually around 10-15 days old. It will swim to the surface and lay its eggs. The male frog will then mate with the female frog.

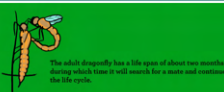

As a frog grows, it needs through three stages of life.

First it is an egg, then a tadpole, and finally an adult frog.

When the eggs are ready to hatch, nymphs will emerge.

A nymph is a small, wingless creature with a crusty body on its back that lives in the water. It has long legs and antennae. It eats other small animals.

When a tadpole is ready to mate, it usually around 10-15 days old. It will swim to the surface and lay its eggs. The male frog will then mate with the female frog.

As a frog grows, it needs through three stages of life.

First it is an egg, then a tadpole, and finally an adult frog.

dinosaurs

We're brachiosaurus.

It means arm lizard - because our front legs are longer than our hind legs - a bit like giraffes.

I'm not actually a dinosaur - I'm a reptile!

My name means thick-plated lizard and I lived in the late Cretaceous period.

Well hello! I'm aardonyx!

I'm an early Jurassic herbivore and my name means earth claw.

We're pteranodons!

Our name means winged and toothless - guess why?

We are ornithomirids!

Our name means egg eater - people thought we were egg-eaters because we were first discovered near evidence of a dinosaur egg.

My name is acrocanthosaurus. Remember it!

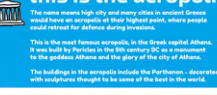

I eat meat. Lots of it. Especially other dinosaurs. Nice big pieces.

world map

this is the acropolis

The acropolis is a high city and many sites in ancient Greece would have an acropolis at their highest point, where people would retreat for defence during war.

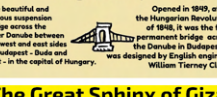

The Statue of Liberty

The statue was created by French sculptor Auguste Bartholdi. It was a gift from France to America in 1886.

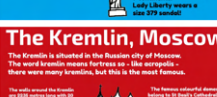

The Chain Bridge in Budapest, Hungary.

Opened in 1895, after the Hungarian Revolution of 1848, it was the first bridge across the River Danube between the west and east sides of Budapest.

The Kremlin, Moscow.

The Kremlin is situated in the Russian city of Moscow. The word Kremlin means fortress so - the acropolis - there were many fortresses, but this is the most famous.

The Great Sphinx of Giza

A sphinx is a creature from ancient mythology with a lion's body and a human head. Built by the Egyptians, often to guard tombs and sacred temples, the most famous and one of the oldest and biggest is the Great Sphinx of Giza.

Mount Fuji

Mount Fuji is the highest and most famous mountain in Japan. It's 3776 meters high and is located 100km southwest of Tokyo.

fairytales & legends

eat sleep doodle

Can you write your own story about Robin Hood? You can include the familiar setting and characters we know of, or you can make up your own new ones!
