

Practical panache of Trivets

We watch with pride how our Danish designs travel the world, entering homes and hearts in new countries around the globe.

Colours on the table

Geometric genius

When you launch a design into the world that sells more than a million in just a few years, that's a real eye-opener! And it's happening totally spontaneously. Because there's something captivating about the decorative design of our Art Deco-inspired HEXAGON and TRIANGLE trivets. The individual trivets can be combined in countless ways to form personal, decorative works of art on the table. They are heat resistant up to 250°C, and their silicone material is wipe-clean and pleasant to the touch. Both designs now come in two sizes.
