

SUZANNE RAFFELLINI
GLASS ARTIST

SUZANNE RAFFELLINI: GLASS ARTIST

Suzanne Raffellini is a glass artist working with both stained and fused glass.

Exploring glass as a medium to create a range of items from jewellery to stained glass windows and fused glass sculptures.

Suzanne's work draws inspiration from the Buckinghamshire countryside around where she lives.

She is fascinated by the human emotional response to the colours of glass and her work explores the interaction of light with glass and how the emotional response of the viewer changes with change in the quality of the light interacting with glass.

PRODUCT COLLECTION

I design and create a variety of handcrafted pieces; from delicate decorative items and statement bowls to unique jewellery and larger works of art. Each piece is made with care and creativity, and reflects my passion for glass.

You can find my work available to purchase online, at selected fairs and exhibitions, or get in touch for wholesale enquiries.

JEWELLERY

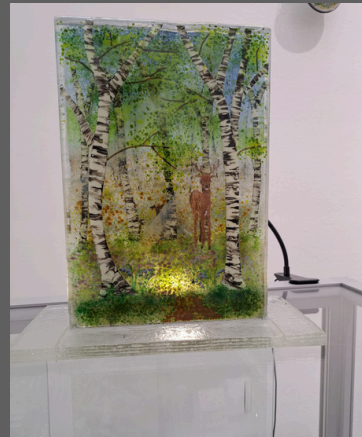

Each piece of handmade glass jewellery is a celebration of colour, light, and individuality. I carefully craft my creations by hand, combining traditional techniques with a contemporary twist to create unique, wearable works of art. No two items are the same—just like the people who wear them.

Pattern and abstract form make each piece original: each is individually handcrafted, ensuring every artwork is truly one-of-a-kind. Whether bold and vibrant or subtle and atmospheric, these pieces are designed to draw the eye and add an authentic touch of creativity to your walls.

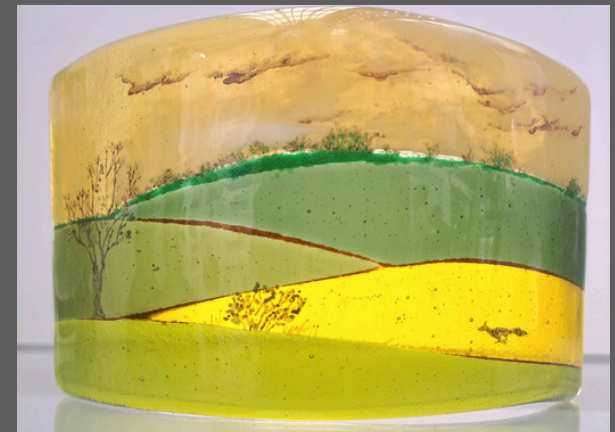

SCULPTURE

My glass sculptures explore form, flow, and the interplay of light and shadow. Each piece is individually handcrafted, combining traditional techniques with modern design to create expressive, tactile works of art. From fluid curves to bold geometric shapes, these sculptural pieces are designed to invite curiosity, spark emotion, and bring a contemporary edge to any space.

WALL ART

Blending colour, texture, and light to create striking visual statements for any space, My glass wall art is inspired by nature

COPPER FOILING

Copper foiled glass pieces bring together rich colour, intricate detail, and timeless craftsmanship. Using the traditional Tiffany technique, I hand-cut and assemble each piece of glass, wrapping it in copper foil before soldering it into place. The result is a collection of beautifully delicate yet durable creations—from decorative panels to light-catching ornaments—each with its own unique character and charm.
