

## About Eriskay Candles

Based in East Lothian, Eriskay Candles was created by Kay. We have a passion to support local business while providing quality, luxury eco friendly products that can be enjoyed by everyone. We pride ourselves on working with products that are kind to the environment.

When developing our candles, it was important to our ethos to provide a clean burning Soy alternative due to the carbon footprint associated with Soy. Our products are purchased within the UK/Europe to promote a lower carbon footprint and help those businesses closest to home. Rapeseed wax is renewable, sustainable and eco friendly. It provides a great scent throw both cold and warm and most importantly we are placing our business back in the hands of our farmers.

ERISKAY | CANDLES
