

# **NEW:** Up to 77% faster loading time with FACT-Finder Web Components.

ROI in record time and higher shop performance. Cross-industry A/B tests prove: our Web Components not only simplify the integration of FACT-Finder, they also significantly accelerate the display of your shop pages.

## **Integrating FACT-Finder has never been easier**

With the new Web Components you can bring the benefits of FACT-Finder with remarkable speed into your online store, regardless of the shop systems or web technologies you are currently using.

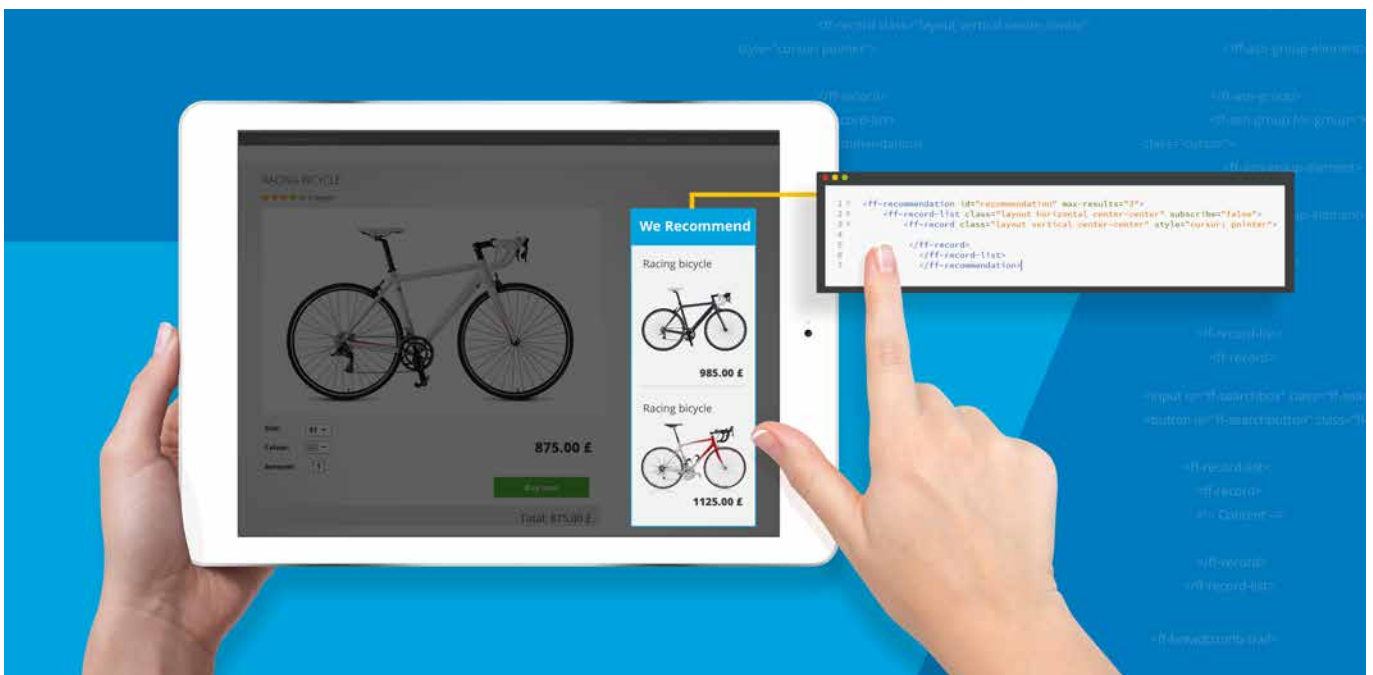

Web Components are short, powerful HTML snippets that display functionalities in the browser. Adding them to your site is as simple and easy as adding a YouTube video or Google map.

For each FACT-Finder module an HTML element is available, which works on all major browsers. Once integrated, you can adjust the Web Components to your specific requirements, without prior planning. Whether you're adding new shop functions, adapting existing ones, or preparing A/B-testing, with basic programming knowledge you can do all of this within minutes.

## **The advantages:**

- Faster loading time
- Lower project costs
- Faster front-end adaptations
- Simplified updates
- Simplified A/B-tests
- Compatible with all major browsers

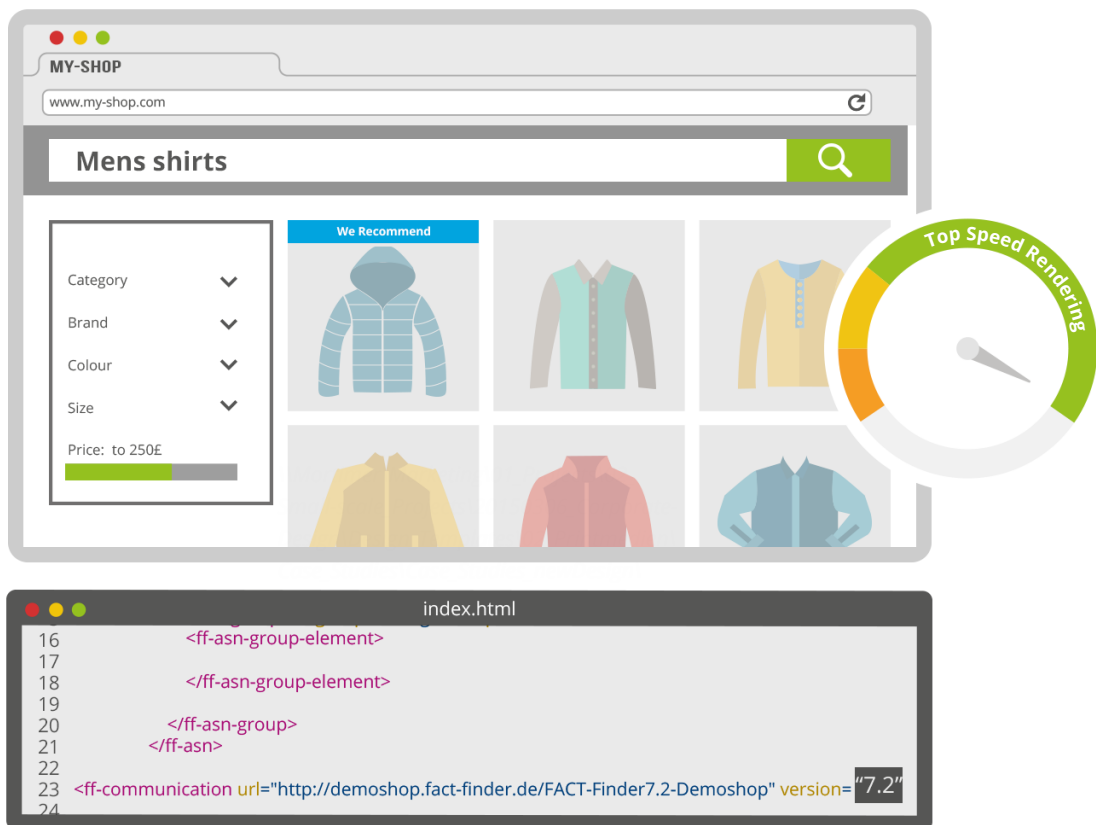

*Web Components facilitate both FACT-Finder integration and adjustments in front-end.*

## High-performing and compatible with all updates.

It is even easier to keep your online shop up-to-date. That's because Web Components simplify the update process whenever a new FACT-Finder Version becomes available. As well as ensuring that all FACT-Finder functions continue operating without restrictions when

there are shop updates.

Another main advantage is highly-evident in the front-end. Via Web Components, product results and filters are rendered more quickly, directly improving the user experience.

*Speed is key to e-commerce success - this applies to projects, shop updates and the display of search results. To accelerate your online shop, use Web Components from FACT-Finder.*
