- Firmer Supported Sides
- Quilted Natural Viscose Panels, Border and Handles

YOUR NEW SHIRE MATTRESS

Congratulations on the Delivery of your new Shire Beds Mattress, a National Bed Federation award winning company.

The Artisan Range has been handcrafted by our highly skilled team in our Yorkshire factory so you Never Lose Sleep Again.

We create every mattress individually to order for your personal satisfaction.

Post Delivery

Your Artisan mattress has a large number individual pocket springs and deep layers of fillings so is Heavy and we always recommend that 2 people should lift or move your mattress.

The handles are there to assist you in turning and rotating your mattress but not to be used for lengthy carrying. Once you have unwrapped your new mattress we recommend you have it in a well ventilated room as the natural fillings do have a slight odour which will dissipate over the first couple of days.

Mattress Sizes

Your Artisan Range Mattress is always handmade and therefore may vary by plus or minus 2cm this is well within National Industry standards. During delivery your mattress can contract but over the first few days in your home will relax and return to normal size and feel.

Tufts

Some of our Artisan range mattresses are hand tufted, we do this to ensure that the natural layers of luxury fillings remain in place. Occasionally a tuft can snap during transit if this unusual event was to happen then please contact your retailer who will make arrangements for a repair.

General Information

Never fold or roll your mattress as this can cause damage. Do not jump on your bed as this could cause damage to the springs and damage your base.

All our Artisan range mattresses are 100% safe to use with an electric blanket but may change the feel of the mattress.

Protecting and Cleaning your Mattress

We always recommend you use a good quality cotton or wool mattress protector but do remove it from time to time to allow the mattress to air. You should remove all bedding and sweep off any dust or fluff from time to time (never use a vacuum cleaner as this can unsettle the natural fillings).

You can use a waterproof protector but this will reduce the benefits of any natural fillings in your new Artisan mattress and in the long term may cause damage due to condensation. In the event of a spillage use kitchen roll or a sponge to absorb excess liquid, use a weak solution of soap and water on a damp cloth to remove slight marks.

Supporting Your Mattress

If you are using your existing base please ensure it is in good condition as your mattress will contour to it as it does to your body. If using a slatted base, the gaps should be less than 75mm apart as this does not support the spring unit so we advise you place a baseboard under your mattress.

Impressions in Your Mattress

The vast majority of people sleep in the same or similar position every night so it is normal for your handmade mattress to have your body impression. You will therefore find the fillings settle and dip to conform to your body shape in the area you sleep and may cause a ridge in the centre of your mattress. This is your new mattress getting to know you and is as normal similar to the indentations which you find on the insoles of your shoes.

To reduce impressions in your mattress we recommend the regular turning and rotating of your mattress (see below), if you are unable to turn and rotate your mattress the natural fillings will settle of their own accord. (Remember your Signature mattress is heavy and we advise 2 people to move it).

A single sided mattress like a pillowtop or non-turn mattress only needs rotating. A double sided mattress needs turning and rotating.

Any claims under the guarantee should be made directly through your retailer. Shire Beds reserve the right to change styles, colours and specification at any time.

Artisan

RANGE

Shire Beds is a multi award winning company: awarded the Best of British at The Furniture Awards 2022, declared winner of the prestigious Product of the Year at the NBF Awards 2021 for The Shire Signature Collection and was runner up with The Artisan Constable in 2019.

Our products are underpinned by excellent production and processes. We are a fully compliant NBF "A" rated manufacturer, SMETA compliant and have the ISO 9001 quality assurance. Quality and excellence are key to all that we do.

We take our responsibility to the planet seriously. Our focus on innovation ensures we develop products that have eco design and environmental sustainability at their core thus meeting the needs of today's consumer.

SHIRE BED BASES & HEADBOARDS

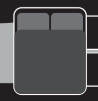

At Shire Beds we offer Divans, Ottomans and Headboards in our exceptional range of Artisan Fabrics.

Artisan Range Divan: This is a strengthened handmade divan base which comes fully padded then upholstered with our Luxury fabrics. It has metal hidden links for strength and chrome plated Shepherd style castors. This is made as a 12" base as it is usually purchased with a deeper mattress in mind. The usual drawer options are all available with enhanced smooth ball bearing runners.

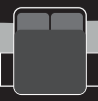

Artisan Range Ottoman: Available in both end and side lift with additional padding and The Artisan Range Luxury Fabrics. The German gas lift system is both stronger and smoother to ensure longevity.

Artisan Headboards: Our range of headboards, come in the Luxury Artisan Range of fabrics and offer a wide range of designs in both, Floorstanding and Strutted heights. We manufacture all our headboards in house to ensure quality and perfect colour match.

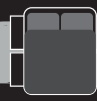

Drawer Options:

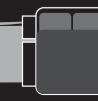

2 DRAWERS (One Side)

2 DRAWERS (Foot End)

4 DRAWERS

2-2 DRAWERS CONTINENTAL
