## The Gel Matràh Range incorporates our revolutionary Gel-Lex™ foam

These mattresses combine a Gel-Lex™ feel to provide a sensational sleeping environment. Great alternative to traditional memory foam mattresses. Convoluted sleep surfaces coupled with luxurious quilted covers provide perfectly balanced comfort layers to enhance the sleep experience further.

### Get Back Your Quality Sleep:

- All the benefits of traditional memory foam:** Just like the memory foam products you've heard about for years, gel memory foam is durable and comfortable. It also resists motion transfer, so when your bed partner moves around or gets in and out of bed, it won't disturb your slumber.
- Increased air circulation:** Gel memory foam is made of gel beads that are infused into memory foam, and this creates an open cell structure that promotes air movement. The heat from your body dissipates instead of collecting in your mattress,

topper, or pillow. This helps you maintain a cool, comfortable temperature all night.

- Medium balanced support:** Gel memory foam provides a firm yet comfortable sleep surface. It fits to your body without letting you sink in too deeply, a concern that some users of traditional memory foam products have. Gel memory foam products are designed with extra support where you need it, so you'll have just the right amount of contact.

- Pressure relief:** Side sleepers often have issues with pressure on their hips and shoulders while they sleep. The pressure on these points causes the tossing and turning that can keep you from getting

good, continuous sleep. Gel memory foam gently cradles your body, so painful pressure points are eliminated, relieving pressure points that traditional mattresses may aggravate.

- Spinal alignment:** When your body is cradled correctly and the pressure has been taken off your shoulders and hips, your spine is encouraged to align. When your back feels good in the morning, you will feel refreshed and rejuvenated from your night's sleep.

- Something for every sleeper:** No matter what has been keeping you up at night, there's a gel memory foam product that can help.
