Welcome to The Flora Lab!

Who we are?

Welcome to the Flora Lab; specialists in hand poured natural-wax candles. We're also proud artisans of luxury botanical wax melts and soy derived reed diffusers.

Our process:

Our natural, plant based waxes are tailored to each candle, ensuring the perfect combination of wick, wax and fragrance. This bespoke method has been developed over months of rigorous testing, ensuring a high quality candle, which delivers on scent performance, consumer consciousness and longevity.

Our most popular waxes include coconut, rapeseed and soy, all of which are sourced ethically and sustainably and paired with a cotton wick. Once poured, our candles are stored for up to two weeks, allowing the scents to fully develop, ensuring they're tip top once your customers receive them.

All of our packaging is either reusable, recyclable, biodegradable or compostable. We have a strict zero tolerance on single use packaging products.

Our Designs:

Beautifully designed, each scent collection has a hand drawn illustration which captures the personality of the fragrance. These have all been drawn by one of our founders, and their disruptive nature ensures they will stand out on shelf.
