BOOK BINDERY

Our story..

Charfleet Book Bindery creates high quality stationery collections for retailers and brands across the UK and worldwide, using traditional British skills, craftsmanship and materials.

From our studio and factory in Essex, we design and manufacture custom stationery in-house. The design team will develop your brand across a wide range of formats, including diaries, journals and notebooks. Our factory then manufactures these with paper, linen or leather coverings, embellished with embossing, foiling and gilt page edges.

Long standing relationships with carefully audited paper merchants and leather tanneries ensure we offer the highest quality materials, with suitable environmental accreditations.

We have a 130-year history of expertise in book-binding and stationery manufacturing. The story continues today with significant investment in a new, purpose-built factory and bindery, opening in January 2023.

Leathersmith of London is our own brand collection of fine leather stationery and accessories.

BOOK BINDERY

Using our in-house design and production facilities, alongside our expertise in specifying materials and print finishes, we will translate your mood-board, brand guidelines or archive material in to high quality stationery.

Our speciality is to deliver individual products or complete collections that develop your brand or your license into high quality stationery, ready for any channel including retail, publishing or promotional activity.

## BESPOKE Design & Trend

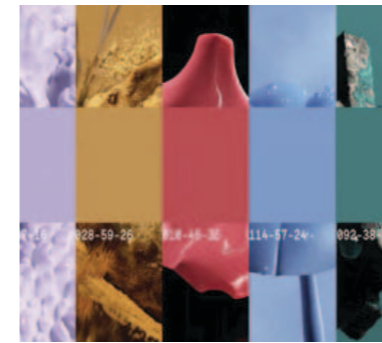

Trend alert!

Whilst there will always be a place for tradition within the leather goods and stationery markets, we strongly believe that there is always a space for new trends and ideas.

*We design branded inner pages for your collections - planning is currently on trend*

COLOUR TRENDS  
Designs reflect future Pantone colours

INTERIOR TRENDS  
Provide inspiration for leather colours

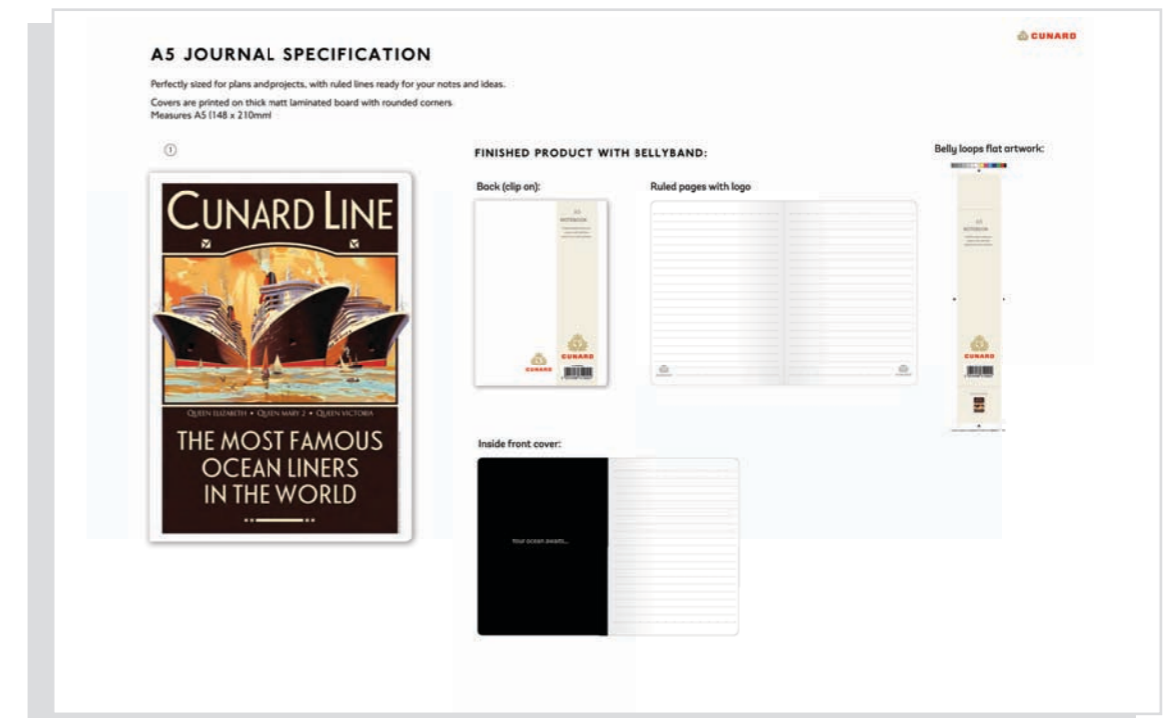

MOOD BOARDS..  
..start the design process

Our design studio monitors trends across the board - from the latest interior looks to next season's Pantone colours. With this knowledge we can create your next stationery collection, reflecting your brand as well as introducing as much or as little "new" as needed.

*We generate design presentations and full manufacturing specs for your approval.*

## Headline Actions 2023

- The majority of our packaging is now recyclable and all waste is recycled.
- Our products are designed to be durable and long-lasting to minimise environmental impact.
- We promote equal pay, equal rights and anti-discrimination across our businesses.
- Our modern slavery statement is available [here](#).

### PAPER SUPPLY CHAIN

We only work with long-standing material suppliers, carefully vetted for reliability and consistency.

We are FSC audited, as are all our paper suppliers.

The paper mills that supply us operate an Environmental Management System which complies with the requirements of ISO 14001:2015 and ISO 50001:2011 (Energy Management) for the manufacture and development of fine, speciality and coated papers.

Full supply chain details available on request.

### LEATHER SUPPLY CHAIN

Leathers used in our stationery manufacture are 100% European sourced, predominantly in the UK. They are tested by independent accredited laboratories before production begins to ensure that they conform to strict EU and international standards.

All the leathers we work with are by-products of the food industry. We do not offer or work with rare or exotic leathers.

Tanneries we work with are required to be Leather Working Group certified or have been audited and are awaiting certification.

Full supply chain details available on request.

## Mission Statement

Our mission is to evolve and expand our tradition of fine British craftsmanship to offer the highest quality stationery and leather goods to both our trade and retail clients.

We recognise that we have a responsibility to develop and maintain sound environmental and social practices in our business. Our production and supply chains are suitably audited with FSC and Sedex accreditations.

Continued investment in our operations, such as the purchase and fit out of our new factory have been made to improve efficiency whilst reducing environmental impact.

Most importantly we remain committed to developing our most valuable resource - our staff teams - across all aspects of our business.
