# 1 Saffron Flower Petal Extract

Antioxidant and  
regenerating active  
ingredient

Saffron flower petal extract is an exceptional plant active ingredient that has proven its effectiveness on the signs of ageing. Naturally rich in flavonoids, crocin and phenolic compounds, it acts as an antioxidant shield to fight against the deleterious effects of oxidative stress linked to daily environmental aggressions.

It is also a strong ally against «inflammaging», which is responsible for premature ageing of the skin and is also caused by external aggressions.

*Its composition in safranal  
and crocin helps to boost  
and regenerate the skin  
for a firm and plump appearance.*

## 2 Hyaluronic Acid

Moisturizing and plumping.

**Naturally contained in the skin, it is here incorporated under two different molecular weights:**

- In the deeper layers, the low molecular weight hyaluronic acid has a plumping effect. It stimulates the synthesis of collagen and hyaluronic acid to reduce to reduce both established wrinkles and fines lines of dehydration.
- On the surface, high molecular weight hyaluronic acid can hold up to 1000x its weight in water and thus protect against dehydration. weight in water and thus protects against dehydration.
- It also has the ability to destroy «bad» bacteria in the skin by stimulating the natural synthesis of of antimicrobial peptides.

## 3 Pre-and Post-Biotics

Protection and balance.

They preserve the skin's ecosystem by maintaining the balance of the microbiota and help the skin to defend itself against the inflam'aging that causes the premature appearance of the signs of age and skin sensitivity.

- A mixture of fibres and sugars, PREBIOTICS serve as «food» for living micro-organisms, stimulate the production of antimicrobial peptides and fight the proliferation of «bad» skin bacteria.
- POSTBIOTICS are inanimate microorganisms produced by bacterial fermentation. The postbiotic LACTOBIOTYL® targets skin dryness. The quality of the skin is improved, the luminosity of the skin is enhanced, and hydration is restored.
