

ULTRA LIGHT, ULTRA STRONG, ULTRA SLIM.

It should be small, light and practical. This is where our U-series pocket umbrellas hit the mark. The lightest Knirps umbrella convinces with minimal weight, compact dimensions and comfortable canopy size. But despite this lightness, you don't have to sacrifice stability. The optimal material mix of prime quality aluminum from aircraft engineering and fiberglass meet the high quality criteria of the Knirps developers. A sign of the robustness is, among other things, the values from our wind tunnel tests: the manual pocket umbrella withstood 100 km/h.

YOUR ADVANTAGES:

- additional sales despite taking up little space
- spontaneous rainy weather leads to impulse purchase
- extensive and attractive display solutions for your POS

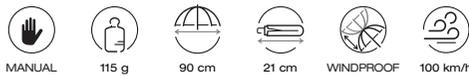

reddot winner 2020
