# PURIFY ENERGISE RENEW

All candles are handmade with a blend of beeswax, coconut wax and essential oils.

---

## GOOD QUALITY

The sustainable product gives you the assurance of healthy breathing experience while promoting healthy planet. Enjoy the benefits of chemical free living with this environment - friendly product. All products can be recycled and reused.

---

## OUR FEATURES

01

Like honey, beeswax is all natural. It has antibacterial properties and release negative ions which purify the air in your surrounding.

02

Coconut wax is non-toxic, non-GMO product and create no soot particles during the burn. They have low impact on the ecosystem and do not require pesticides to keep insects away.

03

We use pure essential oils in all our candles. The oils infuse in the wax which provides a calming and soothing environment for you.

## OUR MISSION

The company is aiming to create and provide a healthy breathing environment for everyone. We aim to be on a journey with every customer to make them enjoy and appreciate the natural fragrances in their daily life. Our candles also contribute to make their environment calming and pollutant free.
