

## Storigraphic

We are an independent design studio and sustainable brand started up by life-long best friends and designers, Nic Graham and Roz Nazerian.

Launched in 2020, our vision was to bring design home, to boldly transform the everyday — by producing exclusively designed, sustainably-led and UK manufactured products, accessible to everyone.

Our inspirations include pop culture, mid-century design, art history, fashion, nature, heritage, empowerment and modern architecture. We love to infuse our graphic design credentials with colour intensity and storytelling into each design collection, applied across paperware, gifts, accessories and our recently launched homeware series, Storihome.

We are practising advocates in equality, inclusivity and diversity, we love what we do, and work hard to bring our very best every day.

Our paperware, accessories and homeware products have been featured in UK and international print and online magazines covering trends, product launches, brand interviews and values, collaborations, as well as design collections — a few titles shown below:
