

ARCANA  
NATURE WITHIN

CATALOGUE S/S 2024

# Introducing Arcana

Arcana's mission is to awaken a stronger interest in nature by embellishing the everyday with beauty and meaning, transforming homes into havens with heirloom woven blankets and cushion covers, sustainable fine art prints and gallery embroidered patches.

Our collections are infused with the 3 things we are most passionate about: nature, education and art.

Ria Mishaal, an artist & science educator behind Arcana, creates art that tells real natural world stories. She believes in the power of bringing beauty and depth to the things we use every day.

In a world of throwaway, of discarding and the disposable, we champion longevity and sustainability. More than pretty interiors and inspirational décor, Arcana is about design led education and inspiring connection with nature and creativity.

Wrap yourself up in a world of wildlife and wonder.  
Change begins at home.

## The Arcana Ethos

Our ethos is one of education. We believe that authentic change takes place following deep-bedded knowledge. We wanted to create something that wasn't just pretty but purposeful.

The intricacy and the artwork has been designed so that it shows the depth and distinction behind each species. Every time you curl up, we want you to see something new and for change to unfold, imitating the magic of the natural world.

Every piece in our collections comes with a guidebook or gatefold companion, to learn about the inspiration and origin of the artwork. This has been written to inspire curiosity, with accuracy in natural history and with authenticity.

Backed by science, designed with soul and educating through art, Arcana is all about alchemy. Fusing the real world with the natural world. Not just appreciating it, but understanding it. Arcana represents the great secret of nature, celebrating it and sharing it.

We promise education & beauty to inspire change.

WILDLORE GALLERY PATCHES

## WILDLORE GALLERY PATCHES

Our Wildlore gallery patches are miniature works of art, stunning embroidery weaving the story of species symbolic in our culture, intended to embellish your every day and bring the beauty of nature into your world.

Celebrating our cultural connection with different plants and animals, these 'gallery patches' are more than embellishments; they are educators, conversation starters, and connectors to the grand tapestry of life.

Each patch comes in a gate-fold presentation card, not only creating a beautiful moment of reveal, but also educating on the science and symbolism of the piece. Grouped around popular meanings, the patches symbolise fortune, friendship and many identifiable traits that make them irresistible gifts.

The back of the gate-fold card (shown opposite) also suggests how the patches might be used - for example, framed as embroidered works of art, used to embellish clothing or bags, combined to make original art on pennant flags, or used to embellish your favourite notebook or sketchbook.

Choose from 12 designs to create your own unique mix of meanings for your customers, for example 'The Loved', 'The Joyful' and 'The Hopeful' are wonderful choices for a gardening enthusiast.

The full list of meanings are: The Long Lived, The Authentic Path, The Transformed, The Protected, The Resourceful, The Fortunate, The Individual, The Joyful, The Loved, The Tenacious, The Kindred and The Hopeful.

FINE ART PRINTS

## FINE ART PRINTS

Our fine art prints, produced on sustainable agave paper, continue our thread of conscious craftsmanship, and come with detailed information about the artwork.

Each art print is carefully made on Hahnemühle Agave 290gsm paper, a choice that reflects both quality and care for the environment. This special paper, made with 70% sustainable sisal fibres, offers a natural, bright white background that brings out the true colours of the artwork. It's free from optical brighteners, so the colours you see are pure and vibrant.

The texture of the paper is unique – it's slightly rough yet pleasantly soft to the touch, adding a real depth to every image. We use a matte coating that ensures each detail of your art is captured perfectly, with rich blacks and clear contrasts.

We print with Epson Ultrachrome Pro archival inks, known for their durability and vibrant colours. These inks help make sure your print will last a long time and continue to inspire. The paper is also acid- and lignin-free, meeting high standards for age resistance.

Each piece comes in a biodegradable sleeve. On the back of the packaging, you will find detailed notes on how the print was made and the story of the art piece.

From the science to the symbolism of the subject, each description continues Arcana's mission to encourage connection with the natural world through art.

# ARCANA TAPESTY BLANKETS

## ARCANA TAPESTRY BLANKETS

Our blankets are woven from 75% recycled cotton, 20% spun cotton and 5% polyester that is required in the recycled cotton portion to retain its strength.

All the colours you see are woven from just six colours of threads, which can be seen in the 1.5 inch fringing on the edge. Two edges show the colours, two show black and white threads. Each soft tapestry blanket contains over 8 miles of yarn.

Because the blankets are woven, every one is reversible, showing different colours on the back.

## Machine Washable Recycled Cotton

From cosying up with a book to lying on the beach, you can use your blanket everywhere at any time of year, as the lightweight nature of the fabric allows amazing versatility. You can hand or even machine wash the blanket in cold water on a delicate cycle using a mild detergent, so you don't need to worry about loving it and taking it everywhere.

CELEBRATING THE CONNECTION BETWEEN HOUSE PLANTS & MENTAL HEALTH

## INDOOR JUNGLE

Plants spread positivity, improving our moods, reducing stress and increasing productivity and concentration, they have even been proven to increase pain tolerance. This is plant power.

In this collection, we embrace plants inside, woven into the very fabric of your home: featuring species such as Maranta, Calathea and iconic Monstera.

Welcome to the Indoor Jungle.

A NOCTURNAL NARRATIVE

## NIGHT GARDEN

When the lights go out and the night draws in, your garden fills with life. Celebrating back garden biodiversity, you'll discover moths for every month of the year, paired with the plants that hungry caterpillars feed upon. With art imitating nature, the blanket is filled from ground to tree level, plants climbing up the edges untethered and coming alive with an abundance of nightlife. Spot the rose chafer beetle in its iridescent green splendour.

A TREE OF WISDOM AND SANCTUARY

## WILD OAK

Oak trees are embedded in our culture and deserved a dedicated collection: a haven for 2,300 species, nurtured by different parts of this majestic tree. Find the oak growing in the blanket folds. Green woodpeckers, purple emperors, blue ground beetles and faithful squirrels are attracted to the oak, and like animals to the Arc, the wildlife is supported by this tree. Strengthened and safe, oak is a sanctuary for creatures of all shapes and sizes.

THE BEAUTY AND BIODIVERSITY OF THE  
BELIZEAN RAINFOREST

# FOREST FLIGHT

There's an abundance of things to see in the Belizean rainforest. Look up to find tree species, cedar, cecropia and firebush, housing a party of woodpeckers, hummingbirds, oropendolas, euphonias, trogons and toucans. Let your imagination take flight, see what you can find.

AN ANCIENT ALLIANCE

## POLLINATION

The summer garden, overflowing with colour and scent, full of flowers designed to attract insect visitors. These pollinators travel from flower to flower, feeding on sweet nectar and pollen. In exchange, they transfer pollen from plant to plant, helping the plant reproduce. The alliance between insects and plants is as old as the first flowering plants, some 130 million years ago. This collection celebrates the ancient relationship between insects and plants, co-evolved to survive and thrive.

SEAWEED TO SEA STARS

## INTERTIDAL

As the tide goes out, the secrets of the ocean can be discovered. The intertidal zone, a place submerged in water at high tide and exposed at low tide, is a unique environment where you'll find a wealth of creatures and plants seeking refuge in rock pools and nestling in the sand: sea stars to seaweeds, sea snails, anemones and crabs. This collection is owed to these beautiful jewels of the coastal change.

ELEGANT CUSHION COVERS

## ARCANA CUSHION COVERS

From woven recycled cotton covers, which show completely different designs front and back, to delicate printed organic cotton covers with gold zero waste fabric detailing. These covers have been hand sewn by an independent seamstress in Hampshire in England, and are machine washable.

They are very special indeed.

### **Our recycled cotton woven covers**

These 43cm square cushion covers, woven with recycled cotton and edged with recycled linen piping. Woven in North Carolina by skilled weavers in a small family run business, and sewn by a seamstress in Hampshire, England, these cushion covers are washable at 30°C on a gentle cycle.

### **Our organic cotton printed covers**

These 44cm square cushion covers feature a printed front made of certified 100% organic half panama cotton, with the back and piping made from a gold ochre herringbone fabric which is 'zero waste'.

The zero waste fabric is created from surplus yarns that are left over from the sampling process or unused in previous collections in a Lancashire weaving mill. There is only a limited quantity of this fabric available, so these very special and luxurious cushions are limited edition.

Printed in England with OEKO-TEX and GOTS Certified Ink, and sewn by a seamstress in Hampshire, these cushion covers are also washable at 30°C on a gentle cycle.

*This page from top to bottom: Cushion covers - Pollination Bloom Rose, Pollination Bloom Jade, Intertidal Shore Crab, Pollination Meadow (the latter also shown with the blanket of the same name on the previous spread).*
