"The surface artwork is hand-painted by founder Kati in her Surrey studio before being printed onto the vegan suede top and the result is beautiful - a colour palette reminiscent of an Ibiza sunset sees juicy oranges shot through with pink and flecked with gold. It's as invigorating as it is bold, and also comes beautifully packaged, so would make a great gift"

"Creativity, Movement and Artistry have been key throughout my life. My creative expression began early, dancing from age 4, through to adulthood. Yoga was a natural progression and support, with a home practice that guided me through many difficult times, linking the mind and movement with my spiritual practice. It has become my essential sanctuary.

I always knew I wanted to make a positive impact in the design industry. My career started in global fashion institutions such as Diane Von Furstenberg, Vivienne Westwood, becoming Head of Design at Maria Grachvogel, specialising in draping around the female form and working with brands that have empowerment at their core.

This took me around the world, absorbing cultures, capturing colours and energies. I painted these musings, marks and expressions throughout my journey, creating large scale colour field canvasses with a 'spiritual' energy to them, which I began to exhibit. What started as a project, taking art 'off the wall' has grown to inspire others to embrace creativity."
