

WILDLIFE GARDEN

20
YEARS

*Joyful designs
inspired by nature*

Twenty years is a long time

It's already been an incredible 20 years since my husband, Robert, and I started Wildlife Garden.

Back then, we had a deep passion for nature, birds, and gardening. From this, the idea for the now-classic Multiholk was born – birdhouses and feeders designed to match the home. The first product to reach the market was Multiholk Torpet, which was inspired by the traditional small red cottages found in the Swedish countryside.

Now, Robert is retired, but Wildlife Garden in Båstad has grown and consists of a fantastic team of twelve people. Our passion for nature remains unchanged, and our range has expanded. We've developed more product groups and items, all inspired by nature. A continued focus on quality, artisanship, and joyful products runs through everything we create.

As we attend several European trade shows each year, we see how our products are received – we see smiles when people interact with them. It's a

sign that we're succeeding in reaching our goal: spreading joy in everyday life. It also motivates us to keep being creative and to develop new, joyful, functional products.

Looking ahead, we see many fun years of continued growth – new products, more markets, and fantastic new customers and colleagues.

This spring, our familiar product groups are expanding with several new additions: DecoBirds, keyrings, kitchen roll holders, hooks, and wooden sculptures. On top of that, we're introducing a brand-new product group: key cabinets! Two sleek variants with a playful, bird-inspired touch.

Welcome to our world!

Helena Nobel

CHARADRIUS DUBIUS CURONICUS GML.

Mindre Strandpipare.

Our Design Philosophy

Our mission is to spread joy in people's every day through nature-inspired, handcrafted products.

Every item we create has a clear connection to nature, reflected both in the materials and motifs we use. Through our products, we seek to inspire a deeper interest in nature and cultivate a greater appreciation for the environment.

Our Swedish-designed products are genuine craft pieces that blend utility with nature-inspired aesthetics. Thanks to their timeless design, our products remain relevant year after year, regardless of changing trends, and become cherished classics in the home.

Sustainability is a cornerstone of our design process. We conscientiously select materials and colours to minimise our impact on the environment.

We also ensure that our products are robust and long-lasting. Our packaging is strong and made from durable cardboard to protect the products during transportation. Additionally, we offer spare parts to ensure our wares have a long lifespan.

By blending nature-inspired design with sustainable and thoughtfully chosen materials, we create durable products that bring joy to everyday life. In this way, each product becomes an expression of our love for both nature and artisanship.

Joyful Designs, Inspired by Nature

Inspired by everyday life and nature's wonders, we create products where function meets beauty and organic shapes.

We pluck our motifs and colours from the world around us – plants, animals, the sea, and the sky.

But it's not just about capturing nature's essence – our products are crafted to spread joy in daily life. Playful, practical, and decorative, they add a personal and welcoming feel to any home.

Every piece is unique – from its shape to its colour. Subtle variations in the artisanship mean no two products are exactly alike, giving each creation character and personality.

From Sketch to Finished Product

It begins with a sketch – an idea that takes shape, inspired by nature's shapes and colours – and journeys from paper to the final product. Our design process happens in-house, from the first playful pencil stroke to a 3D-printed prototype.

We've worked closely with our suppliers in China for many years, building a solid and fruitful partnership. Through long-standing associates, regular visits, and having on-site staff, we ensure that each product meets our high standards of quality and artisanship.

Along the journey from sketch to final product, we fill each step with creativity, playfulness, curiosity, and a lust for new discoveries—always with a steady focus on the details of the craft.

Organise

Shapes borrowed from nature give these everyday items a playful design language. From carved magnets and keyrings to key cabinets, hand-carved hooks, and bookends, these functional items create a personal style that helps to keep things organised and tidy in the hustle and bustle of daily life.

Key Cabinets

Create a striking focal point in your hallway with a nature-inspired key cabinet. Each cabinet, crafted in cherrywood, features a playful detail on its door - a hand-carved woodpecker or a chip-carved magpie.

The cabinets have a traditional linseed oil finish, complementing the brass on the hinges. Magnets keep the cabinet doors shut and ensure the doors open and close smoothly, whilst a threshold prevents anything from falling out. Inside, seven pegs organise the keys in two neat rows.

Material: Cherrywood, water-based paint | Weight: 1 kg

Wooden Boxes

The wooden boxes are suitable for jewellery, keys, desk accessories or other small items you want to store. The boxes have a decorative but low-key style and are ideal to place on a shelf, desk or bedside table.

The boxes are genuine crafts pieces whose materials have a unique character and feel. Each wooden box is made to age beautifully. The carved surface casts beautiful surface shadows that enhance the natural feel of the material.

Pens

Our collections of wood-carved ballpoint pens playfully depict nature's creations. The feather pens showcase the jay's, dove's, and woodpecker's feathers. The vegetable pens come wrapped in a hemp cord, making them easy to store.

Material: Hand-carved wood, water-based paint, replaceable ballpoint pen | Weight: 8–15 g

Clips

The clips are old-fashioned clothes pegs made entirely of wood. Each peg is hand-carved and hand-painted in water-based paint. They have many uses besides hanging laundry - sealing bags, bookmarks, and much more.

Material: Hand-carved wood, water-based paint | Weight: 6–10 g

Magnets

Our magnet collection features popular butterflies, birds, and animals skillfully hand-carved and painted in water-based paints. The magnetic butterflies are life-sized. Wrap their enclosed metal wire around an object and attach the butterfly to it as a playful decoration.

Material: Hand-carved wood, water-based paint, magnet | Weight: 6–9 g

Tableware

We design our nature-inspired tableware with great care and attention to detail. The playful, intricate, and practical designs create a relaxed and welcoming atmosphere at the dinner table.

The collection encompasses beautiful wood-carved pieces hand-painted in water-based paints and sleek metal items in steel.

Bottle Openers & Stoppers

With shapes inspired by nature's diversity, we've created a collection of fun and functional bottle stoppers and openers. Playful yet practical, these tableware details bring nature into the home and spark delightful conversations.

The bottle stoppers feature animal and plant motifs and fit a variety of bottle types. The bottle openers, with their water bird motifs, offer a comfortable grip, and the discreetly integrated metal opener remains hidden when the bird rests on the table. These intricately detailed, hand-carved items are hand-painted with water-based paint.

Material: Hand-carved wood, water-based paint, cork (WG4990–WG4995), metal (WG4986–WG4989)

Our journey

From basement to office.

The Multiholk – a combined birdhouse and feeder and Wildlife Garden's first product – was created in a basement at Helena and Robert's home in 2005. Inspired by nature, we have continued to develop an expanding range of products for garden enthusiasts and nature lovers.

From starting with the Multiholk, sold at Swedish garden fairs, we have grown over the past 20 years into an international company with around 1,000 retailers worldwide. And our office, now in a scenic setting, is home to 12 enthusiastic employees.

41

Home Accessories

Add a personal touch to the home with functional homeware inspired by the natural world. This collection contains iconic favourites, timeless pieces, and harmonious shapes. Each item, regardless of series, shares the typical Scandinavian design language, despite differences in production methods.

Here, handmade birds, cast iron sculptures, and practical everyday items made of wood and metal come together to spread joy in the everyday.

Diffuser

An eagle-owl, hand-carved out of red cedar wood, guards the clothes in your wardrobe. Inside the owl is a diffuser filled with cedar oil that disperses a refreshing scent. Hang the owl from a clothes hanger using the leather string at the top of the owl's head. When the cedar oil runs out, refill it with the 10 ml cedar oil refill bottle.

Material: Hand-carved wood | Weight: 85 g

Wood-carved Animals

The collection of wood-carved animals is the perfect decoration for the living room or the conservatory. The selection represents well-known garden visitors, hand-painted in water-based paints. Being handmade makes each piece unique, and some variations may appear between items.

Material: Hand-carved wood, water-based paint

Silhouettes

The silhouettes are a collection of stylized animals depicted in black metal. They are neat design details either indoors or outdoors, adding a playful touch wherever you place them. Attach them to fences, a roof, railings, on the lawn, or even in a flowerbed.

Some silhouettes (WG701–WG706) can stand independently without screws, while others come with additional footrests that enable them to stand independently (WG752–WG758). To make WG750 and WG751 stand, fasten them to a surface using screws or pegs.

DecoBird—Wood-carved Birds

DecoBird is an iconic, ever-growing family of authentic wood-carved birds. They are popular as collector's items, design gifts, and nature-inspired homeware details. Today, even schools use them as teaching aids and to adorn classrooms. Each hand-carved bird comes with an informative booklet about the species and its geographical range.

DecoBirds are craft products developed in collaboration with ornithologists, product designers and artisans. The result is an extensive bird family where each piece is unique. The products are hand-painted with water-based paints and made for indoor use.

Depending on the size of the bird, Wildlife Gardens' DecoBirds come packaged in two different types of boxes. Large birds come in a standard box, while medium and small birds come in display boxes with windows.

Material: Hand-carved wood, water-based paint | Weight: 20–860 g

Circles next to each bird illustrate their geographic range. Use the map legend to find out on which continents the bird presides.

Nests & Feeders

Our collections of architectural nests and feeders attract wildlife to the garden. All design work and production processes occur in collaboration with ornithologists and experts, resulting in products adapted to the guests' needs. The feeders prioritise hygiene to prevent diseases from spreading between the birds, and the nests have a range of adaptations to ensure that the inhabitants thrive.

The whole collection features materials that are stylish, functional and weatherproof.

Multiholk

Be inspired by our lively assortment of dream homes for your feathery friends. The iconic Multiholk's clever design means it's usable year-round. During the colder months, the Multiholk is a bird feeder, and it transforms into a nest during the spring. You effortlessly change its use from feeder to nest by opening the entrance hole and inserting the base plate.

Multiholk is well-thought-out, with creative solutions and a playful design. Grooves below the inside of the entrance hole ensure the fledglings can climb out of the nest. And the material selection and ventilation holes help maintain the correct temperature during hot and cold days.

Multiholk is part of an ever-growing product family with classic, modern and countryside houses. All houses have decorative details that enhance their style.

Material: Solid wood | Weight: 1,0 kg | Capacity: 2 litres of feed | Accessories: Bracket, screws, wooden perches

Multifeeder Barn

The Multifeeder Barn has several interior compartments to fill with different types of birdfeed. Offering a greater variety of feed attracts a greater variety of birds. Try peanuts, sunflower seeds, suet balls or even seed mixtures. The interior compartments protect the feed from the elements. And, as the small birds land to eat, they too are kept dry. The barn's narrow ledges make it difficult for larger birds to land and scare away the small birds.

Material: Solid wood | Weight: 1.8 kg | Capacity: Ca 5 litres of feed | Accessories: Screws, wooden perches, mounting plate

Bird Feeder with Bath

Create movement and life in your garden with a stylish house with a built-in bird pool. With its clever design, the house will attract different bird species all year round. The pool will be a place for garden birds to quench their thirst, wash and frolic.

The bird feeder is made of wood. The roof with the built-in pool consists of weather- and frost-resistant plastic.

Material: Wood, recyclable plastic roof | Weight: 1.1 kg | Capacity: 2.5 l of seeds | Accessories: Screws, metal perches

Metal Cottage Feeders

Shaped like small cottages, these hanging bird feeders have a clever design. The mesh gives the best grip possible while minimising the risk of diseases spreading between the birds.

Material: Powder-coated steel | Weight: 0,3 kg | Capacity: Approximately 6 suet balls / 1,2 l peanuts | Accessories: Metal wire

Giant Feeder

Holding six litres of seed, the Giant Feeder only needs filling occasionally. Its recyclable plastic insert, which contains the birdseed, is easy to remove for cleaning. Larger birds find it difficult to land on the perching ring, meaning that small birds can enjoy their meals in peace. The Giant Feeder has six feeding windows, allowing many birds to feed at the same time.

Material: Powder-coated steel, recyclable plastic | Weight: 1.8 kg | Capacity: 6 l | Accessories: Screws

Combi Feeder Seeds

Combi Feeder Seeds is a hanging seed dispenser. Its design, with a plastic insert and feeding windows, lends itself to different seed mixes. The Combi Feeder also works as a suet ball or apple feeder. Remove the plastic insert and fill it with apples or suet balls.

Material: Powder-coated steel, recyclable plastic | Weight: 0.4 kg | Capacity: 1.2 l | Accessories: Short and long perches, wire

For Pollinators and Other Garden Visitors

To support local wildlife, we've collaborated with experts to create homes for bees, butterflies, and bats, who struggle to find nesting places in our urban areas. We've also designed a squirrel feeder to help keep them fed and steer them away from the bird feeders.

Material: Solid wood, bamboo canes (WG311–WG312), plexiglass window (WG313–WG413)

Posts & Mounts

Create a wildlife haven with small changes in your garden—bird feeders, nests, and bird baths can do wonders. When tree- or wall-mounting is not an option, you can opt for a post or swing arm that fits most of our Multiholks, nests and bird feeders. Outdoor candles in the garden give a cosy atmosphere when evening approaches. Lift the light a bit higher with a pole to create interesting shadows in the darkness.

WG902

Swing Arm

L: 520 W: 80 H: 185 mm

1 kg | 1 / pack

Powder-coated steel

Mounting the Swing Arm directly outside your window makes it easy to see the birdlife up close and refill your bird feeder with seeds. The Swing Arm fits Wildlife Garden's Multiholks and Bird Feeders with Bath. For safety reasons, mount the Swing Arm no higher than 2.5 m above the ground. The Swing Arm can hold a maximum load of 4,5 kg.

WG905

Pole Black

L: 38 W: 38 H: 1203 mm

0,8 kg | 6 / pack

Solid wood

Post for firm assembly of bird feeders. The height is adapted to provide a stable fixture and fits all our feeders and nests.

WG907

Metal Pole

L: 80 W: 80 H: 1245 mm

2 kg | 4 / pack

Powder-coated steel

The metal pole is durable, stable, and weather-resistant. The shape makes it easy to get into the ground, and the sturdy construction means that it can handle loads of up to 10 kg. This post fits the Multiholks, Multifeder Barns, Bird Feeders with Bath and the Giant Feeders. The post disassembles into three parts for easy transportation.

WG908

Three-piece Post

L: 38 w: 38 H: 1205 mm

0,8 kg | 1 / pack

Solid wood

The three-piece, black-stained post fits all Multiholks, Bird Feeders with Bath, Bee Nests, Butterfly Boxes, Squirrel Feeders and Balcony Nesting Boxes. Coming in three parts makes the pole easy to transport. Each segment is 43 cm, and the assembled post has a total length of 120 cm.

WG9909

Outdoor Candle Stake

L: 123 W: 123 H: 630 mm

0,4 kg | 1 / pack

Powder-coated steel

The pole for outdoor candles lifts the light a bit higher, creating exciting shadows in the darkness.

Retail Displays

We offer several solutions for profiling and displaying Wildlife Garden's products. The display material, made of wood, comes complete with our logo.

Our packaging acts both to protect the product and as an attractive gift box, often with a display window. The packaging, made of untreated corrugated cardboard, is 100% recyclable—our goal is to replace all plastic packaging with sustainable materials wherever possible.

Displays

To see more of our display materials, log into our retailer webshop, or contact us at +46 431-768 00 or info@wildlifegarden.se.

The displays are sold empty, please order your choice of products separately.
