Flower care

Dried flowers are really easy to look after and require little to no maintenance.

To keep your bouquet vibrant, place it in a spot out of direct sunlight.

It's also best to keep your bouquet out of your bathroom, as the condensation could weaken its stems.

We recommend not moving them around too much, as this can cause petals and foliage to drop.

Your bouquet will benefit from the occasional dusting with a hairdryer or a small brush. If using a hairdryer hold it a meter away from your flowers, on a cool and light setting.

Keep out of the reach of children and animals.

Keep away from soft furnishings as the colour from some stems may transfer.
