Your favourite da Vinci wooden kits now in miniature!

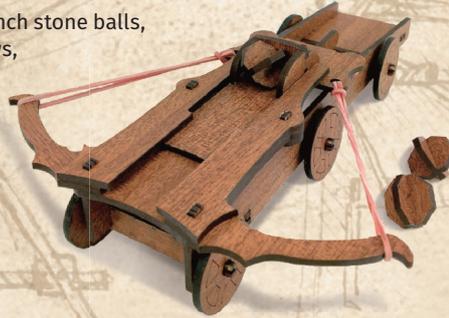

Leonardo da Vinci Mini Wooden Kits

Mini Leonardo da Vinci Crossbow

7 93888 87739 9
Approx. H50 × W140 × D190 mm assembled
GMSTA-33437

- One of Leonardo's most epic weapons
- Designed to launch stone balls, instead of arrows, like most crossbows
- Launches a mini ball three metres!

Mini Leonardo da Vinci Aerial Screw

7 93888 87779 5
Approx. H160 × W110 × D110 mm assembled
GMSTA-33435

- Includes a canopy that spins on the support structure, illustrating a way Leonardo thought flight might be possible!
- A fun and inspiring project from one of the great minds of history!

Mini Leonardo da Vinci Bombard

7 93888 87749 8
Approx. H100 × W60 × D120 mm assembled
GMSTA-33438

- Leonardo was a military engineer who drew many designs of weapons
- Re-create one of Leonardo's iconic images of a cannon and exploding cannonballs
- Launch small projectiles and re-live those whimsical Renaissance days!

Mini Leonardo da Vinci Ornithopter

7 93888 87789 4
Approx. H170 × W260 × 140 mm assembled
GMSTA-33434

- Leonardo's fascination with birds and flight was evident in his many studies of human powered flying machines
- A fun model that you can make, flap and ponder Leonardo's ingenuity!

Mini Leonardo da Vinci Bicycle

7 93888 87769 6
Approx. H100 × W60 × D180 mm assembled
GMSTA-33436

- Inspired by Leonardo, this incredible bicycle image was discovered hidden in the Codex Atlanticus folio of Leonardo's drawings and writings
- Channel your inner Leonardo and make a cool model of one of his mysterious designs!

Mini Leonardo da Vinci Catapult

7 93888 87759 7
Approx. H110 × W60 × D190 mm assembled
GMSTA-33433

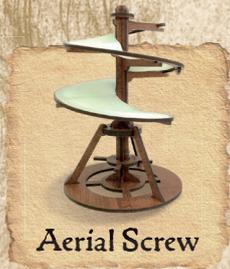

- Re-create one of Leonardo's more interesting designs that uses the power of bent wood to launch projectiles
- Make and launch small projectiles up to 10 metres!

Easy to make in about 30 minutes • Wood pre-cut and ready to assemble • £14.99 inc. VAT • Age 8+ years

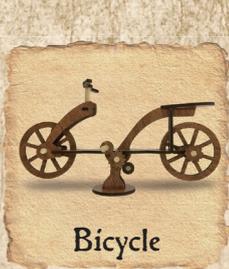

Leonardo da Vinci

Mini Wooden Kits

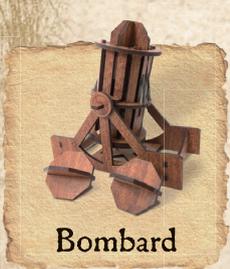

Leonardo da Vinci, widely known as a painter, was also an architect and engineer who designed many buildings and machines. From his fertile mind sprang designs for flying machines and instruments of war, as well as practical theories and concepts in engineering, mathematics and science, many of which were centuries ahead of their time.
